Cars & Parts ,1977 **Digital Airborne Camera** Rainer Sandau,2009-12-10 Digital airborne cameras are now penetrating the fields of photogrammetry and remote sensing Due to the last decade s results in research and development in the fields of for instance detector technology computing power memory capacity position and orientation measurement it is now possible to generate with this new generation of airborne cameras different sets of geometric and spectral data with high geometric and radiometric resolutions within a single flight This is a decisive advantage as compared to film based airborne cameras The linear characteristic of the opto electronic converters is the basis for the transition from an imaging camera to an images generating measuring instrument Because of the direct digital processing chain from the airborne camera to the data products there is no need for the processes of chemical film development and digitising the film information Failure sources as well as investments and staff costs are avoided But the effective use of this new technology requires the knowledge of the features of the image and information generation its possibilities and its restrictions This book describes all components of a digital airborne camera from the object to be imaged to the mass memory device So the image quality influencing processes in nature are described as for instance the reflection of the electromagnetic sun spectrum at the objects to be imaged and the influence of the atmosphere Also the essential features of the new digital sensor system their characteristics and parameters

are addressed and put into the system context The complexity of the cooperation of all camera components as for instance optics filters detector elements analogue and digital electronics software and so forth becomes transparent The book includes also the description of example systems

The SGML Implementation Guide Brian E. Travis,Dale C. Waldt,2012-12-06 Foreword SGML is misunderstood and underestimated I have always wanted to write this book I am pleased that two people with whom I have had the pleasure to work were finally able to do so Since I have always been a bit of an evangelist I feel pride when my students become recognized teachers In the early years of SGML we struggled to define a language that would bring the information to its rightful place We succeeded Then we had to explain these idea to technical adoptors Again I think we have succeeded We have learned much about SGML in the process of implementing it These experiences must now also be shared along with comprehensible information on the lan guage itself The word must move out of the lab and the computer center and reach the business people the users the movers and shakers The next generation will do things with SGML that we can t even imagine yet it is that versatile
