Alley, 2011-04-18 The book companion to a PBS series that proves humans are causing global warming and offers a path to the future Since the discovery of fire humans have been energy users and always will be And this is a good thing our mastery of energy is what separates us from the rest of the animal kingdom and has allowed us to be the

dominant species on the planet However this mastery comes with a price we are changing our environment in a profoundly negative way by heating it up Using one engaging story after another coupled with accessible scientific facts world authority Richard B Alley explores the fascinating history of energy use by humans over the centuries gives a doubt destroying proof that already high levels of carbon dioxide are causing damaging global warming and surveys the alternative energy options that are available to exploit right now These new energy sources might well be the engines for economic growth in the twenty first century

3D Recording and Interpretation for Maritime Archaeology John K. McCarthy, Jonathan Benjamin, Trevor Winton, Wendy van Duivenvoorde, 2019-03-06 This open access peer reviewed volume was inspired by the UNESCO UNITWIN Network for Underwater Archaeology International Workshop held at Flinders University Adelaide Australia in November 2016 Content is based on but not limited to the work presented at the workshop which was dedicated to 3D recording and interpretation for maritime archaeology The volume consists of contributions from leading international experts as well as up and coming early career researchers from around the globe The content of the book includes recording and analysis of maritime archaeology through emerging technologies including both practical and theoretical contributions Topics include photogrammetric recording laser scanning marine geophysical 3D survey techniques virtual reality 3D modelling and reconstruction data integration and Geographic Information Systems The principal incentive for this publication is the ongoing rapid shift in the methodologies of maritime archaeology within recent years and a marked increase in the use of 3D and digital approaches This convergence of digital technologies such as underwater photography and photogrammetry 3D sonar 3D virtual reality and 3D printing has highlighted a pressing need for these new methodologies to be considered together both in terms of defining the state of the art and for consideration of future directions As a scholarly publication the audience for the book includes students and researchers as well as professionals working in various aspects of archaeology heritage management education museums and public policy It will be of special interest to those working in the field of coastal cultural resource management and underwater archaeology but will also be of broader interest to anyone interested in archaeology and to those in other disciplines who are now engaging with 3D recording and visualization

Precision medicine approaches for heterogeneous conditions such as autism spectrum disorders (The need for a biomarker exploration phase in clinical trials - Phase 2m) David Quentin Beversdorf, Craig Andrew Erickson, Paul Wang, Thomas Frazier, 2023-04-17 Many therapeutic interventions for autism spectrum disorder fail when they are examined in a clinical trial Frequently there is a subset of patients that responds very well to the intervention while others do not and the overall result does not yield a positive result As autism spectrum disorder is highly heterogeneous in its underlying genetics and other etiological risk factors as well as its heterogeneous phenotypic manifestation this variability in response to any specific treatment is not entirely surprising However it remains a challenge to meaningfully subtype this

heterogeneity for targeted treatment The purpose of this research topic is to solicit articles that address the heterogeneity in autism spectrum disorder in a manner that may meaningfully contribute to targeted treatment approaches Studies that address the heterogeneity of autism that could theoretically lead to targeted treatment and studies that more directly address the use of a marker in association with response to a treatment are both aspects that will contribute to this purpose It is hoped that this Research Topic will yield articles that can help advance the field towards precision medicine in autism spectrum disorders Manuscripts that contribute to the specification of the heterogeneity of autism spectrum disorder in a manner that could theoretically lead to targeted treatment would be appropriate for this research topic Additionally articles that utilize subtyping in relation to response to treatment would be appropriate for this research topic Maine Register; Or, State Year-book and Legislative Manual ,1987 **Moody's Manual of Investments: American and Foreign** ,1953
