Online Videos 3D Animationen Gangdaten und Fallstudien *Analysing Data from Capacitive Floor Sensors for Human Gait Assessment Using Artificial Neural Networks* Raoul Hoffmann, 2023 Gait analysis is valuable in medical research and diagnosis by delivering information that helps in choosing methods of intervention and rehabilitation that are beneficial for a patient In gait laboratories cameras or IMUs are often used to gather gait patterns This thesis explores the possibility of using sensors below the floor as a gait data source These sensors measure changes in the electrical capacitance to recognise steps The construction is designed for indoor environments and is hidden under common flooring layer types Therefore it is very robust and suitable for practical use in daily clinical routine A formal framework was developed to represent the measurements considering the special characteristics of this floor sensor The data were then used as input for artificial neural networks that were applied on classification and regression tasks In a feature construction and extraction approach the spatial spread of footfalls was derived and used with a feed forward neural network Then in a feature learning approach the time series data was transformed into a local receptive field and used with a recurrent neural network Three studies were conducted for the goals to distinguish between people with low and high risk of falling to estimate age and to recognise walking challenges as an external gait intervention The combination of a robust and hidden floor sensor and machine learning opens up the prospect of future applications in health and care [Merriman's Assessment of the Lower Limb E-Book](#) Ben Yates, 2012-01-17 Merriman's Assessment of the Lower Limb has established itself through two editions as the benchmark text book of lower limb examination and assessment The third edition preserves the lucidity logical approach and comprehensive coverage of its predecessors but adds many exciting features including online resources videos and images many new contributors thorough updating of all chapters many of which have been completely rewritten and an entirely new chapter on functional assessment The online resources access via <http://booksite.elsevier.com/9780080451077> provide extensive videos of assessment techniques and illustrations practitioners with patients and models show how to assess all parts of the lower limb and evaluate various conditions Together with its companion volume Clinical Skills in Treating the Foot the new third edition of Merriman's Assessment of the Lower Limb is a truly indispensable guide for podiatry students

Locomotion and Posture in Older Adults Fabio Augusto Barbieri, Rodrigo Vitória, Paulo Cezar Rocha dos Santos, 2025-02-19 This book sheds new light on the effects of aging and movement disorders on movement control during walking and postural tasks Understanding these dynamics is more important than ever as we face a future where the number of older adults is projected to double by 2050 The severity of this framework is exacerbated when aging is accompanied by movement disorders such as Parkinson's disease Chorea Multiple Sclerosis Dystonia and Huntington's disease The book explores how complex interactions between

musculoskeletal and neural systems are required for efficient execution of daily activities like walking and maintaining posture. The chapters in this comprehensive volume address the multifaceted challenges posed by aging and movement disorders in gait and postural control, including innovative rehabilitation strategies and the role of artificial intelligence. Expert contributors examine how environmental, sensorial, motor, cognitive, and individual factors influence locomotor and postural activities. Readers will discover cutting-edge research findings that address critical questions about planning, performance, and impairment in these essential functions. This book is a must-read for anyone seeking to understand and reduce the effects of aging and movement disorders on gait and posture. This book is an invaluable resource for clinicians, physical therapists, occupational therapists, psychologists, biologists, researchers, health professionals, as well as those involved in physical education and sports medicine. It highlights the mechanisms involved in controlling and planning postural and gait tasks in both neurologically healthy older individuals and those who suffer from movement disorders, offering new perspectives on interventions and technologies designed to improve understanding or delay impairments due to aging or movement disorders on gait and posture. Whether you're a practitioner or researcher in related fields, this book equips you with the essential knowledge to enhance the quality of life for older adults facing these challenges.

Designing Intelligent Healthcare Systems, Products, and Services Using Disruptive Technologies and Health Informatics

Teena Bagga, Kamal Upreti, Nishant Kumar, Amirul Hasan Ansari, Danish Nadeem, 2022-08-08. Disruptive technologies are gaining importance in healthcare systems and health informatics. By discussing computational intelligence, IoT, blockchain, cloud, and big data analytics, this book provides support to researchers and other stakeholders involved in designing intelligent systems used in healthcare, its products, and its services. This book offers both theoretical and practical application-based chapters and presents novel technical studies on designing intelligent healthcare systems, products, and services. It offers conceptual and visionary content comprising hypothetical and speculative scenarios and will also include recently developed disruptive holistic techniques in healthcare and the monitoring of physiological data. Metaheuristic computational intelligence-based algorithms for analysis, diagnosis, and prevention of disease through disruptive technologies are also provided. **Designing Intelligent Healthcare Systems, Products, and Services Using Disruptive Technologies and Health Informatics** is written for researchers, academicians, and professionals to bring them up to speed on current research endeavours, as well as to introduce hypothetical and speculative scenarios.

Research Anthology on Diagnosing and Treating Neurocognitive Disorders

Management Association, Information Resources, 2020-08-30.
