## **October 1998 Amnesty International Report:**

The Kosovo Conflict and International Law Heike Krieger, 2001-07-12 This book was first published in 2001 The Kosovo Conflict and International Law provides international lawyers scholars and students with access to material on the conflict in Kosovo As well as the basic material relating to Kosovo s status in Yugoslavia before 1999 this volume reproduces the significant documentation on the following issues the development of the human rights situation the diplomatic efforts for the settlement of the crisis the military action against Yugoslavia and the international community s response court action with regard to the conflict and the implementation of the principles for a political solution with an international civil and security presence in Kosovo Dr Krieger s analytical introduction provides the historical and political context as well as an overview of the various legal aspects of the conflict A chronology and detailed index make the documents more accessible Country Reports on Human Rights Practices ,1999 **The Trial Proceedings Of The International Criminal Court** Notburga K. Calvo-Goller, 2006 Contains the trial proceedings of the International Criminal Court the ICTY and the ICTR in one single volume This book covers the procedural and evidentiary aspects of the trials before the ICC from the beginning of an investigation until the time the convict has served the sentence and it includes ICTY and ICTR precedents **Myth America** David McGowan, 2022-04-07 An eye opening and prophetic look at the true state of American politics and culture today Is the U S a beacon of progress That s how the mainstream media want you to see it But in Myth America visionary researcher David McGowan presents an index of disturbing facts and ominous trends that illustrate the deep roots of America s systems of oppression From mandatory minimum sentencing laws to more liberal search and seizure rules from Three Strikes You re Out to congressional legislation for a national ID card McGowan shows how the noose around democracy has been tightening every day for decades if it ever existed in the U S at all David McGowan is the author of the bestselling Weird Scenes Inside the Canyon Laurel Canyon Covert Ops The Dark Heart of the Hippie Dream Myth America was his first book originally published in 2000 under the title Derailing Democracy **Context and Circumstance** Gareth Jenkins, 2013-09-05 Debates about military influence on civilian government tend to be partisan and rarely pay sufficient attention to specific contexts This paper analyses without condemnation or justification why and how the military exercises such influence in Turkey and whether it is likely to continue to do so It argues that the role of the military in Turkey grows out of a specific Turkish context and is more a symptom than a cause of the country s flawed democracy It examines the Turkish officer ethos particularly the role of the indigenous ideology of Kemalism and the broad though not universal public mandate for an interventionist role in politics It contends that the military s influence is neither uniform nor total and that it is more effective at blocking than initiating policy thus creating a system in which civilian authority is primary rather than supreme It analyses the mechanisms through which the military attempts to shape policy and demonstrates how its influence depends more on its informal authority than legislated rights or responsibilities The paper suggests that fears of threats to national security resulting from

the reforms required for EU accession have made the military more not less reluctant to withdraw from the political arena It concludes that regardless of the future of Turkey s candidacy such a withdrawal will be a slow and gradual process dependent more on changes in Turkish social and political culture and the perceived security environment than in the military itself

**Rights in Exile** Guglielmo Verdirame, Barbara E. Harrell-Bond, 2005 Of the estimated 12 million refugees in the world more than 7 million have been confined to camps effectively warehoused in some cases for 10 years or more Holding refugees in camps was anathema to the founders of the refugee protection regime Today with most refugees encamped in the less developed parts of the world the humanitarian apparatus has been transformed into a custodial regime for innocent people Based on rich ethnographic data Rights in Exile exposes the gap between human rights norms and the mandates of international organisations on the one hand and the reality on the ground on the other It will be of wide interest to social scientists and to human rights and international law scholars Policy makers donor governments and humanitarian organizations especially those adopting a rights based approach will also find it an invaluable resource But it is the refugees themselves who could benefit the most if these actors absorb its lessons and apply them Guglielmo Verdirame is a Lecturer in Law at the University of Cambridge and a Fellow of Corpus Christi College He is also the author of a forthcoming book on the accountability of the United Nations Barbara Harrell Bond Founding director of the Refugee Studies Centre University of Oxford has after retirement been Visiting Professor at Makerere University and at the American University in Cairo In 1996 she received the Distinguished Service Award of the American Anthropological Association She is the author of Imposing Aid Oxford 1986

**Human Rights Manual and Sourcebook for Africa** Keir Starmer, Theodora A. Christou, 2005 At a time when the issue of human rights in Africa is making many advances Human Rights Sourcebook and Manual for Africa introduces easy to use jurisprudence The first section covers key principles and human rights norms which are detailed in straightforward language The second section is devoted to the death penalty detailing the relevant provisions from both international and regional instruments and offering a comparative commentary as to how the principles and relevant rights relate to the death penalty The third section summarizes key case law from international regional and

domestic African courts and tribunals The case summaries detail the facts and decisions and include a headnote of relevant concepts for quick reference The fourth section focuses on thirteen African countries yet the reports are a useful comparative resource for all countries From conducting the research and compiling the material for this final section it is apparent that nothing like this has been attempted before in Africa Much of the work emanates from primary research and investigation conducted by local research teams in the individual countries Investigative research includes visiting prisons physically counting the individuals on death row and interviewing the detainees to obtain their age and the length of time they had been on death row

**The East Timor Question** Stephen McCloskey, Paul Hainsworth, 2000-08-11 Originally colonized by the Portuguese East Timor was brutally invaded and occupied by Indonesian military forces in 1975 According to the UN this resulted in the death of about a third of the population through massacres starvation and disease Subsequent events in Indonesia however have given rise to expectations of a fundamental change in its position on East Timor Considering the potential for change against a backdrop of growing popular and political support for the Timorese cause this book addresses its emergence as an issue of global importance The authors set out to show how local grassroots individual organizational and campaign initiatives have contributed to this state of affairs in the context of an increased international relations emphasis on ethics international morality and human rights

**Quotations on Terrorism** Harry Kawilarang, 2004 The year 2000 showed that terrorism continues to pose a clear and present danger to the international community Terrorism is becoming a strategy that has a long history but one that took on a particularly deadly caste beginning in the 21st century The leaders of some of the most dangerous terrorist groups to emerge in the past decade have headquarters or major offices in Afghanistan and their associates threaten stability in many real and potential trouble spots around the globe from Indonesia to the Balkans Central Asia to the Persian Gulf Western China to Somalia and Western Europe to South Asia Terrorists attempt not only to sow panic but also to undermine confidence in the government and political leadership of their target country Terrorism is therefore designed to have psychological effects that reach far beyond its impact on the immediate victims or object of an attack Terrorists mean to frighten and thereby intimidate a wider audience such as a rival ethnic or religious group an entire country and its political leadership or the international community as a whole All terrorist acts involve violence or equally important the threat of violence These violent acts are committed by nongovernmental groups or individuals that is by those who are neither part of nor officially serving in the military forces law enforcement agencies intelligence services or other governmental agencies of an established nation state Terrorism has occurred throughout history for a variety of reasons It causes can be historical cultural political social psychological economic or religious or any combination of these Some countries have proven to be particularly susceptible to terrorism at certain times as Italy and

West Germany were during the 1970s Terrorist violence escalated precipitously in those two countries for a decade before declining equally dramatically Other countries such as Canada and The Netherlands have proven to be more resistant and have experienced only a few isolated terrorist incidents In general democratic countries have provided more fertile ground for terrorism because of the open nature of their societies In such societies citizens have fundamental rights civil liberties are legally protected and government control and constant surveillance of its citizens and their activities is absent By the same token repressive societies in which the government closely monitors citizens and restricts their speech and movement have often provided more difficult environments for terrorists But even police states have not been immune to terrorism despite limiting civil liberties and forbidding free speech and rights of assembly Examples include Russia under tsarist rule and the Communist ruled Union of Soviet Socialist Republics as well as the People s Republic of China Myanmar and Laos The author expressed it all through quotations which was compiled from public figures authors poets scholars experts professionals statements and the common people and collected from books newspapers news weeklies poems speeches oral conversations etc from all part of the world in connecting with the content of this book since 1980

**Caspian Energy Resources** The Emirates Center for Strategic Studies and Research,2000-08-23 The potentially rich energy resources of the Caspian region have proved to be a tantalizing magnet for nations oil companies and investors and this prospective oil bonanza has prompted intense media coverage As nations continually search for new supplies to replace those barrels of oil that are being depleted Caspian oil assumes significance because of its high quality and export potential How far will this potential be realized and to what extent will these resources become a substitute for Gulf oil In this volume a number of researchers and experts discuss the various dimensions of Caspian oil including its attractions the rationale and scope for foreign investment the complexities of the region s legal environment contentious pipeline issues regional political trends and the economic impact of Caspian oil on oil producers from the Arab Gulf countries and the world market Given the limits in the opportunities of developing means to exploit Caspian oil studies suggest that there is little prospect of serious competition to Gulf oil and that the market control of the Arab Gulf producers may be relatively unaffected in the short or medium term However Caspian oil will be a significant addition to non OPEC output and may eventually threaten the predominant position of Gulf oil unless regional oil producers adopt more market oriented economic investment and pricing policies

**Giving Meaning to Economic, Social, and Cultural Rights** Isfahan Merali, Valerie Oosterveld,2011-07-07 The Universal Declaration of Human Rights arguably the founding document of the human rights movement fully embraces economic social and cultural rights as well as civil and political rights within its text However for most of the fifty years since the Declaration was adopted by the General Assembly of the United Nations the focus of the international community has been on civil and political rights This focus has slowly shifted over the past two decades Recent international human rights treaties such as the Convention on the Rights of the Child and the Convention on the Elimination of All Forms of Discrimination Against Women

grant equal importance to protecting and advancing nonpolitical rights In this collection of essays Isfahan Merali Valerie Oosterveld and a team of human rights scholars and activists call for the reintegration of economic social and cultural rights into the human rights agenda The essays are divided into three sections First the contributors examine traditional conceptualizations of human rights that made their categorization possible and suggest a more holistic rights framework that would dissolve such boundaries In the second section they discuss how an integrated approach actually produces a more meaningful analysis of individual economic social and cultural rights Finally the contributors consider how these rights can be monitored and enforced identifying ways international human rights agencies NGOs and states can promote them in the twenty first century
