Comprehensive and user-friendly, this book prepares readers for each step in the research process: design, entering and checking data, testing assumptions, assessing reliability and validity, computing descriptive and inferential parametric and nonparametric statistics, and writing about results. Dialog windows and SPSS syntax along with the output are provided. Several realistic data sets are used to solve the chapter problems and are available as an online resource. This edition includes the following: Updated chapters and screenshots; Additional SPSS work problems; Callout boxes for each chapter indicating crucial elements of APA style and referencing outputs.
