*Learn to speak and write Odia in 30 days* , **Beyond Dalma** Sweta Biswal,2023-12-11 The food on our plates has always been inextricably linked to the agricultural cycle The numerous festivals and rituals that crop up on the Odia calendar or Panji with unfailing regularity inevitably extend clues to eat what s best in the season This book takes one through the never ending cycle of pray eat and repeat while delving into the intricacies of the interrelationships between the agrarian calendar the festivals observed in the various parts of the state of Odisha and the changing seasons Beyond Dalma attempts to focus on the similarities rather than the diversities of the Odia cuisine which itself is an interesting amalgamation of various micro cuisines that have evolved independently shaped by diverse stimuli for the better part of history At the same time one cannot discount that dynamic exchanges among various micro culinary traditions have always occurred due to a multitude of reasons ranging from trade to migrations to even marriages The resulting culinary legacy is one that can be best described as a curious interplay between heterogeneity and homogeneity The recipes are carefully selected keeping the focus on the seasonal aspects of the cuisine rather than emphasizing the regional aspects However a mild proclivity towards Western Odisha may be discernible at times as the author has spent a substantial part of her life in that region The recipes are curated based on local and seasonal produce and designed to help one adhere to a sustainable low carbon footprint lifestyle that is harmoniously aligned with mother nature s basket rather than the supermarket shelves **The Great Mathematicians of Bharat** Partha Pratim Ray ,2023-12-20 The Great Mathematicians of Bharat emerges as a seminal work aligning perfectly with the vision of the National Education Policy NEP 2020 which emphasizes the integration and appreciation of Indian Knowledge Systems IKS in contemporary education This book meticulously documents the rich legacy of India s mathematical geniuses serving as a crucial resource in rekindling interest and respect for Bharat s profound mathematical traditions It underscores the symbiotic relationship between cultural ethos and scientific inquiry highlighting how Indian mathematicians not only contributed to the field of mathematics but also how their work was deeply interwoven with Hindu spiritual and cultural practices By chronicling the journey from ancient sages to modern masters the book provides a comprehensive view of the evolution of mathematical thought in Bharat thus fulfilling NEP 2020 s objective of integrating indigenous knowledge with modern academic frameworks In doing so it not only educates but also inspires setting a precedent for future academic endeavours to explore and celebrate India s rich intellectual heritage *Applying AI-Based Tools and Technologies Towards Revitalization of Indigenous and Endangered Languages* Sushree Sangita Mohanty,Satya Ranjan Dash,Shantipriya Parida,2024-04-23 This book emphasises the need for language resource development and its impact on society It covers latest AI based tools and techniques used to preserve indigenous and endangered languages The book also highlights latest AI based technologies such as Generative Pre trained Transformer GPT towards endangered language preservation It discusses morphology analysis translation support and shallow parsing of
