The Political Economy of Innovation and Entrepreneurship Ivar Jonsson, 2016-03-09. This book offers a general theoretical framework for approaching innovation and entrepreneurship using practical and up-to-date examples to demonstrate three different levels of innovation and entrepreneurship: the macro level which concerns the impact of innovation activity on economic growth and production systems; the meso level which concerns the relations between firms, research institutes, and governmental bodies and their role in innovation activity; and the micro level which concerns the dynamics of innovations within firms and organisations. Providing a critical overview of existing research and demonstrating the importance of a transdisciplinary framework for studies of innovation and entrepreneurship, the author advances a general concept of collective entrepreneurship that emphasises the social and collaborative nature of innovation and entrepreneurship, thus shedding light on processes of innovation and entrepreneurship as active practices of social construction. As such, it will appeal to scholars of

economic sociology political science economic geography and economists as well as those with interests in innovation policy

**The Routledge Handbook of Sustainable Food and Gastronomy** Philip Sloan, Willy Legrand, Clare Hindley, 2015-06-12 The issues surrounding the provision preparation and development of food products is fundamental to every human being on the planet Given the scarcity of agricultural land environmental pollution climate change and the exponential growth of the world's population where starvation and obesity are both widespread it is little wonder that exploring the frontiers of food is now a major focus for researchers and practitioners This timely Handbook provides a systematic guide to the current state of knowledge on sustainable food It begins by analyzing the historical development surrounding food production and consumption then moves on to discuss the current food crisis and challenges as well as the impacts linked to modern agriculture and food security Finally it concludes with a section that examines emerging sustainable food trends and movements in addition to an analysis of current food science innovations Developed from specifically commissioned original contributions the Handbook's inherent multidisciplinary approach paves the way for deeper understanding of all aspects linked to the evolution of food in society including insights into local food food and tourism organic food indigenous and traditional food sustainable restaurant practices consumption patterns and sourcing This book is essential reading for students researchers and academics interested in the possibilities of sustainable forms of gastronomy and gastronomy's contribution to sustainable development The title includes a foreword written by Roberto Flore Head Chef at the Nordic Food Lab Copenhagen Denmark
