ancillary testing in postmortem examinations to serve the needs of today's patient populations. As resident education is re-examined by pathology and education authorities, new competency-based training models will almost certainly come to the fore. A chapter will examine approaches to the future training of medical students, residents and fellows in an environment of changing autopsy exposure. A final chapter will summarize the vision for the autopsy as a clinical outcome measure and valuable scientific resource. This book will be a new type of volume in the field of autopsy pathology. It differs from the presently available review, references and atlases in that it provides guidance for readers to embrace transformations that are already taking place in the field. There currently is no resource that offers comprehensive guidance for modern autopsy practice and looks forward to what the field might become in the future.
