

# FOREWORD

*The SUZUKI RG250W has been developed as a new generation motorcycle. It is packed with highly advanced design concepts including a liquid cooling system, a C.D. ignition system, an anti-dive device and a full-floater suspension system. Combined with precise control and easy handling the RG250W provides excellent performance and outstanding riding comfort.*

*This service manual has been produced primarily for experienced mechanics whose job is to inspect, adjust, repair and service SUZUKI motorcycles. Apprentice mechanics and do-it-yourself mechanics, will also find this manual an extremely useful guide.*

*Model RG250W manufactured to standard specifications is the main subject matter of this manual. However, the RG250W machines distributed in your country might differ in minor respects from the standard-specification and, if they do, it is because some minor modifications (which are of no consequence in most cases as far as servicing is concerned) had to be made to comply with the statutory requirements of your country.*

*This manual contains up-to-date information at the time of its issue. Later made modifications and changes will be explained to each SUZUKI distributor in respective markets, to whom you are kindly requested to make query about updated information, if any.*
