Cassie Robinson

Conditions I like to work in

I like a quiet working environment. I find it hard to do work that requires my concentration if there is a lot of noise and distractions

I like having my own desk space

I find it hard to work in heated rooms, and love fresh air (windows open etc)

The times/hours I like to work

I am trying to start my work day at 10am so that I can have 2 hrs from 8-10am in the mornings to do things like exercise and meditation etc.

I work best in the evenings

I don't mind being contacted at any time but I will likely only respond during week daytimes and evenings

My diary is open and accessible so everyone can see my availability. I don't mind people booking things in my diary if I am free

The best ways to communicate with me

Slack is the quickest way to get a response from me

I will never answer my phone, but I look at text messages

I keep on top of my emails each week and usually respond within a few days at the latest.

The ways I like to receive feedback

I'd rather have difficult conversations than things be unspoken or inauthentic, so just be straight with me

I like receiving feedback face-to-face

I see all feedback as a learning opportunity so I like any feedback to include examples and also suggestions on how I / it could be better/different

Things I need

I love ideas sessions with people, where we can freely think about what is possible without the if's and but's

I need time to reflect

Authenticity - I find it really hard to be around bullshit, inconsistency or incongruence

Things I struggle with

I'm an introvert so working "in the open" is something I have to work hard at

Too much critiquing and logical reasoning drains my energy

If I don't understand the wider purpose behind why we are doing something, I find it hard to engage with

Unnecessary process - I love agile and design-lead process however, it's not always necessary. I like minimum-viable-process - what is enough?

Things I love

I like hearing what others are working on and connecting up the dots of what we are doing

I love organising team things - birthday gifts, evenings out etc.

A generative, risk-taking culture that has a flag in the ground about what it stands for

Quarterly team away days

Other things to know about me

I use my intuition a lot to make decisions

My favourite saying is "the sum of the whole is greater than the sum of the parts."

I am an INFP / INFJ cusp

I don't like or drink tea

I bring my whole self to work (we should chat about what this means to me)

A User'S Guide to Your Mind Volume Ii How to Win in Love & Get Along with Each Other Michael Ra Bouchard, 2011-11-21 Thoughts are very real things They can be compared to the elements that create the weather we experience From clear and sunny to overcast and dreary your thought machine mind creates your reality Whether or not you are consciously aware of it you alone control the angles and rotations of the kaleidoscopic mirrors within the workings of your mind If you don't like your reality you can always adjust your outlook simply by adjusting your way of thinking One of life's mercies is that we can retrain our mind This guide is an appeal for rational thinking When all is said and done there are only three fundamental areas over which you have any real control in your life how you think feel as in two sides of the same coin how you act and how you react When you are unhappy in life or love the best place to start looking for both the cause and the cure is within the inner narrative of your thoughts It is here you will find the fountainhead of resiliency from which your strength and well being flow Resiliency in people is not an accidental occurrence rather it is the cumulative effect of an individual's decision making In a nutshell humans need not always interpret things in the negative instead the choice to view things either as a positive or as a negative is entirely your own to make The intelligent approach insists you strive to see both the positive and the negative in people situations and events Doing so won't negate the negative it simply helps to balance it The knowledge contained in *A User's Guide to Your Mind* is threefold how to live mindfully of your thoughts how to exercise emotional intelligence in relationships and how to exercise social intelligence in everyday life Exercising social and emotional intelligence along with good old common sense is essential to soundly managing your thoughts feelings and behaviors If you are tired of just talking about making changes and are now actually prepared to do something about it the guidance within will provide detailed blueprints to get you started in redesigning your life and relationships Best of all you can implement what you learn as you see fit according to your own goals value system and moral principles This book shows you how
