This book contains 150 short essay questions clearly structured to facilitate both learning and practice. I'm Teaching Middle School Science C.* Jill Swango, Sally Boles Steward, 2003 Like your own personal survival guide. *Help! I'm Teaching Middle School Science* is a nontechnical how-to manual, especially for first-year teachers. But even veteran teachers can benefit from the plentiful ideas, examples, and tips on teaching science the way middle schoolers learn best. The book covers all the basics: what to do on the first day of school, including icebreaker activities; preparing safe and effective lab lessons; managing the classroom; working with in-school teams as well as parents. But its practical and encouraging approach doesn't mean it shortchanges the basics of effective pedagogy. You'll learn how to handle cooperative learning and assessment; how to help students write effectively; and the importance of modeling for early adolescents. **Excel Preliminary Legal Studies** Belinda Brassil, 2003 Basics in Medical Education Zubair Amin, Hoon Eng Khoo, 2003 Medical education: the art and science behind medical teaching and learning has progressed remarkably. Teaching and learning have become more scientific and rigorous; curricula are based on sound pedagogical principles; and problem-based and other forms of active and self-directed learning have become the mainstream. In short, this is a simple and non-intimidating book for general medical teachers to enhance their understanding of medical education and to improve their teaching.
