Taylor,Guang-Zhong Yang,2011-06-17 This book constitutes the proceedings of the Second International Conference on Information Processing in Computer Assisted Interventions IPCAI 2011 held in Berlin Germany on June 22 2011 The 17 papers presented were carefully reviewed and selected from 29 submissions The focus of the conference is the use of information technology in interventional medicine including real time modeling and analysis technology human machine interfaces and systems associated with operating rooms and interventional suites It also covers the overall information flow associated with intervention planning execution follow up and outcome analysis as well as training and skill assessment for such procedures

Interventional Magnetic Resonance Imaging Thomas Kahn,Harald Busse,2012-08-27 The idea of using the enormous potential of magnetic resonance imaging MRI not only for diagnostic but also for interventional purposes may seem obvious but it took major efforts by engineers physicists and clinicians to come up with dedicated interventional techniques and scanners and improvements are still ongoing Since the inception of interventional MRI in the mid 1990s the

numbers of settings techniques and clinical applications have increased dramatically This state of the art book covers all aspects of interventional MRI The more technical contributions offer an overview of the fundamental ideas and concepts and present the available instrumentation The richly illustrated clinical contributions ranging from MRI guided biopsies to completely MRI controlled therapies in various body regions provide detailed information on established and emerging applications and identify future trends and challenges

Clinical Blood Pool MR Imaging Tim Leiner, Mathias Goyen, Martin Rohrer, Stefan O. Schönberg, 2009-10-27 Magnetic resonance angiography has made great strides with continuing improvements in hardware pulse sequencing and know how allowing ever increasing speed resolution and suppression of artifacts However an inherent physical barrier has always been limited SNR Gadolinium contrast agents help to increase SNR by facilitating T1 relaxation but they can be injected only at a finite rate and at a limited molar dose and there is a rapid drop in concentration following the brief arterial phase due to redistribution into the extracellular fluid compartment With its sixfold increase in T1 relaxivity blood pool distribution and longer serum half life Vasovist represents a new breakthrough which promises to revolutionize MRA image quality once again This excellent treatise on Vasovist created by a team of exceptional faculty who are pioneers in MR angiography covers the basic techniques safety efficacy image processing and pharmacoeconomic details to successfully implement a new level of MRA image quality with this new contrast agent In addition to improving all the usual arterial phase MRA applications the blood pool distribution opens up new possibilities including detecting internal bleeding and imaging stent graft endoleaks which are reviewed in detail In the complex competitive field of cardiovascular imaging this book articulates the cutting edge in imaging vascular disease
