*Music, Piety, and Propaganda* Alexander J. Fisher, 2014-02

*Music Piety and Propaganda* The Soundscapes of Counter Reformation Bavaria explores the nature of sound as a powerful yet ambivalent force in the religious struggles that permeated Germany during the Counter Reformation Author Alexander J Fisher goes beyond a musicological treatment of composers styles and genres to examine how music and more broadly sound itself shaped the aural landscape of Bavaria as the duchy emerged as a militant Catholic bulwark Fisher focuses particularly on the ways in which sound including bell ringing gunfire and popular song as well as cultivated polyphony not only was deployed by Catholic secular and clerical elites to shape the religious identities of Bavarian subjects but also carried the potential to challenge and undermine confessional boundaries Surviving literature archival documents and music illustrate the ways in which Bavarian authorities and their allies in the Catholic clergy and orders deployed sound to underline crucial theological differences with their Protestant antagonists notably the cults of the Virgin Mary the Eucharist and the saints Official and popular rituals like divine worship processions and pilgrimages all featured distinctive sounds and music that shaped and reflected an emerging Catholic identity Although officials imposed a severe regime of religious surveillance the Catholic state's dominance of the soundscape was hardly assured Fisher traces archival sources that show the resilience of Protestant vernacular song in Bavaria the dissemination and performance of forbidden anti Catholic songs the presence of Lutheran chorales in nominally Catholic church services into the late 16th century and the persistence of popular noise more generally

*Music Piety and Propaganda* thus reveals historical theological and cultural issues of the period through the piercing dimension of its sounds bringing into focus the import of sound as a strategic cultural tool with significant impact on the flow of history

**Catholica** Byung Soo Han,2015-05-20 Byung Soo Han intends to answer by investigating the merger of patristic and contemporary sources in the theological method of Amandus Polanus a significant question concerning the way in which the intellectual and methodological eclecticism of the Reformed was able to establish a coherent system of thought capable of defense as not only confessional but also orthodox in its theology and broadly catholic drawing both on the thought of the Reformers and on the resources of the great tradition of Christian thought that extended back to the church fathers From a methodological perspective Polanus s development from the Ramistically organized doctrinal framework of the early Partitiones through the increasingly detailed and specialized efforts of the commentaries disputations and Symphonia indicates a fairly clear concerted effort to build toward a detailed systematic presentation and in fact each of these earlier efforts provided as it were building blocks that would be incorporated into the Syntagma This constructive labor itself serves to set aside the claim that Polanus based his theology on a deductive principle The specific focus of the book is on the place and function of backgrounds and sources traditional and contemporary with particular emphasis on the place of the church fathers in Reformed orthodoxy Polanus s patristic work Symphonia and its eventual impact on his full systematic work the Syntagma provides a singular case within the sixteenth and seventeenth centuries of the reformulation of patristic thought in a fully systematized form suitable for combination with the results of biblical exegesis and contemporary doctrinal argumentation in the formulation of Reformed orthodox theology This study attempts to assess the claim of catholicity and orthodoxy by Reformed theology demonstrating the formative function of patristic thought in Polanus s theology Further the study illustrates the place of this traditionary exercise within the methodologically eclectic approach followed by Polanus and his contemporaries as they created a theology that drew not only on Scripture and contemporary philosophical assumptions but also on patristic medieval Reformation era traditionary Aristotelian Platonic and Ramist sources This study therefore reappraises the development of Reformed orthodoxy In Polanus s case an older scholarship that read his theology as based on central dogmas or as an exercise of rationalism will be set aside in favor of a more nuanced view of his sources and method Within this larger framework Polanus s use of the fathers builds on and confirms the Reformers s assumption of catholicity in the face of the detailed polemics of Robert Bellarmine as well as confirming the point that his approach to formulation was traditionary and somewhat eclectic Finally the book identifies the theological cohesion of the early orthodox Reformed model as exemplified by Polanus s thought especially in its method of drawing together of traditionary materials

from varied sources In short the book demonstrates the importance of the church fathers to the formulation of a Reformed orthodox and catholic theology in the context of showing contrary to previous studies of Polanus s thought and contrary to the older stereotypes of Calvinist orthodoxy that Reformed orthodoxy was neither a rigid monolith nor a matter of philosophical speculation but the product of a carefully conceived exercise in the compilation and assessment of biblical and traditionary materials      **Paracelsian Moments** Gerhild Scholz Williams, Charles D. Gunnoe Jr., 2003-03-01 Scientific ideas inspired by religious magical and alchemical themes competed alongside traditional Aristotelian science and the emerging mechanical philosophy in the early modern era At the center of this ferment was a quirky and creative German physician Paracelsus whose religious alchemical worldview served as an inspiration for countless scientific innovators This collection is about Paracelsus and the wide range of issues he explored and ones taken up by many who were directly or indirectly affected by the same mental universe that sustained his thought and writings This volume includes strong contextual studies on Paracelsianism and the larger cultural history of early modern science including groundbreaking studies on Robert Boyle Fran ois Rabelais Giovanni Pico della Mirandola and Johannes Praetorius      A biographical and critical dictionary of painters and engravers, from the revival of the art under Cimabue, and the alleged discovery of engraving by Finiguerra, to the present times with the ciphers, monograms, and marks, used by each engraveur: by Michael Bryan Michael Bryan, 1865
