Collica,2021-07-14 Better understand your customers using segmentation analytics in SAS Viya Segmentation Analytics with SAS Viya An Approach to Clustering and Visualization demonstrates the use of clustering and machine learning methods for the purpose of segmenting customer or client data into useful categories for marketing market research next best offers by segment and more This book highlights the latest and greatest methods available that show the power of SAS Viya while solving typical industry issues Packed with real world examples this book provides readers with practical methods of using SAS Visual Data Mining and Machine Learning VDMML SAS Model Studio SAS Visual Statistics SAS Visual Analytics and coding in SAS Studio for segmentation model development and analysis This book is designed for analysts data miners and data scientists who need to use the all in memory platform of SAS Viya for the purposes of clustering and segmentation Understanding how customers behave is a primary objective of most organizations and segmentation is a key analytic method for achieving that objective

   Text Mining and Analysis Dr. Goutam Chakraborty,Murali Pagolu,Satish Garla,2014-11-22 Big data It s unstructured it s coming at you fast and there s lots of it In fact the majority of big data is text oriented thanks to the proliferation of online sources such as blogs emails and social media However having big data means little if you can t leverage it with analytics Now you can explore the large volumes of unstructured text data that your organization has collected with Text Mining and Analysis Practical Methods Examples and Case Studies Using SAS This hands on guide to text analytics using SAS provides detailed step by step instructions and explanations on how to mine your text data for valuable insight Through its comprehensive approach you ll learn not just how to analyze your data but how to collect cleanse organize categorize explore and interpret it as well Text Mining and Analysis also features an extensive set of case studies so you can see examples of how the applications work with real world data from a variety of industries Text analytics enables you to gain insights about your customers behaviors and sentiments Leverage your organization s text data and use those insights for making better business decisions with Text Mining and Analysis This book is part of the SAS Press program   Data Mining Using SAS Enterprise Miner Randall Matignon,2007-08-13 The most thorough and up to date introduction to data mining techniques using SAS Enterprise Miner The Sample Explore Modify Model and Assess SEMMA methodology of SAS Enterprise Miner is an extremely valuable analytical tool for making critical business and marketing decisions Until now there has been no single authoritative book that explores every node relationship and pattern that is a part of the Enterprise Miner software with regard to SEMMA design and data mining analysis Data Mining Using SAS Enterprise Miner introduces readers to a wide variety of data mining techniques and explains the purpose of and reasoning behind every node that is a part of the Enterprise Miner software Each chapter begins with a short introduction to the assortment of statistics that is generated from the various nodes in SAS Enterprise Miner v4 3 followed by detailed explanations of configuration settings that are

located within each node Features of the book include The exploration of node relationships and patterns using data from an assortment of computations charts and graphs commonly used in SAS procedures A step by step approach to each node discussion along with an assortment of illustrations that acquaint the reader with the SAS Enterprise Miner working environment Descriptive detail of the powerful Score node and associated SAS code which showcases the important of managing editing executing and creating custom designed Score code for the benefit of fair and comprehensive business decision making Complete coverage of the wide variety of statistical techniques that can be performed using the SEMMA nodes An accompanying Web site that provides downloadable Score code training code and data sets for further implementation manipulation and interpretation as well as SAS IML software programming code This book is a well crafted study guide on the various methods employed to randomly sample partition graph transform filter impute replace cluster and process data as well as interactively group and iteratively process data while performing a wide variety of modeling techniques within the process flow of the SAS Enterprise Miner software Data Mining Using SAS Enterprise Miner is suitable as a supplemental text for advanced undergraduate and graduate students of statistics and computer science and is also an invaluable all encompassing guide to data mining for novice statisticians and experts alike   *Data Mining Using SAS Applications* George Fernandez,2010-12-12 Most books on data mining focus on principles and furnish few instructions on how to carry out a data mining project Data Mining Using SAS Applications not only introduces the key concepts but also enables readers to understand and successfully apply data mining methods using powerful yet user friendly SAS macro call files These methods stress the use of visualization to thoroughly study the structure of data and check the validity of statistical models fitted to data Learn how to convert PC databases to SAS data Discover sampling techniques to create training and validation samples Understand frequency data analysis for categorical data Explore supervised and unsupervised learning Master exploratory graphical techniques Acquire model validation techniques in regression and classification The text furnishes 13 easy to use SAS data mining macros designed to work with the standard SAS modules No additional modules or previous experience in SAS programming is required The author shows how to perform complete predictive modeling including data exploration model fitting assumption checks validation and scoring new data on SAS datasets in less than ten minutes   *Neural Network Modeling Using SAS Enterprise Miner* Randall Matignon,2005-08 This book is designed in making statisticians researchers and programmers aware of the awesome new product now available in SAS called Enterprise Miner The book will also make readers get familiar with the neural network forecasting methodology in statistics One of the goals to this book is making the powerful new SAS module called Enterprise Miner easy for you to use with step by step instructions in creating a Enterprise Miner process flow diagram in preparation to data mining analysis and neural network forecast modeling Topics discussed in this book An overview to traditional regression modeling An overview to neural network modeling Numerical examples of various neural network designs and optimization techniques An overview

to the powerful SAS product called Enterprise Miner An overview to the SAS neural network modeling procedure called PROC NEURAL Designing a SAS Enterprise Miner process flow diagram to perform neural network forecast modeling and traditional regression modeling with an explanation to the various configuration settings to the Enterprise Miner nodes used in the analysis Comparing neural network forecast modeling estimates with traditional modeling estimates based on various examples from SAS manuals and literature with an added overview to the various modeling designs and a brief explanation to the SAS modeling procedures option statements and corresponding SAS output listings   <u>SAS For Dummies</u> Chris Hemedinger,2025-04-29 Become data savvy with the widely used data and AI software Data and analytics are essential for any business giving insight into what s working what can be improved and what else needs to be done SAS software helps you make sure you re doing data right with a host of data management reporting and analysis tools SAS For Dummies teaches you the essentials helping you navigate this statistical software and turn information into value In this book learn how to gather data create reports and analyze results You ll also discover how SAS machine learning and AI can help deliver decisions based on data Even if you re brand new to data and analytics this easy to follow guide will turn you into an SAS power user Become familiar with the most popular SAS applications including SAS 9 and SAS Viya Connect to data organize your information and adopt sound data security practices Get a primer on working with data sets variables and statistical analysis Explore and analyze data through SAS programming and rich application interfaces Create and share graphs interactive visualizations to deliver insights This is the perfect Dummies guide for new SAS users looking to improve their skills in any industry and for any organization size   **SAS For Dummies** Stephen McDaniel,Chris Hemedinger,2010-03-16 The fun and easy way to learn to use this leading business intelligence tool Written by an author team who is directly involved with SAS this easy to follow guide is fully updated for the latest release of SAS and covers just what you need to put this popular software to work in your business SAS allows any business or enterprise to improve data delivery analysis reporting movement across a company data mining forecasting statistical analysis and more SAS For Dummies 2nd Edition gives you the necessary background on what SAS can do for you and explains how to use the Enterprise Guide SAS provides statistical and data analysis tools to help you deal with all kinds of data operational financial performance and more Places special emphasis on Enterprise Guide and other analytical tools covering all commonly used features Covers all commonly used features and shows you the practical applications you can put to work in your business Explores how to get various types of data into the software and how to work with databases Covers producing reports and Web reporting tools analytics macros and working with your data In the easy to follow no nonsense For Dummies format SAS For Dummies gives you the knowledge and the confidence to get SAS working for your organization Note CD ROM DVD and other supplementary materials are not included as part of eBook file   *Data Science and Machine Learning for Non-Programmers* Dothang Truong,2024-02-23 As data continues to grow exponentially knowledge of data science and machine learning has become

more crucial than ever Machine learning has grown exponentially however the abundance of resources can be overwhelming making it challenging for new learners This book aims to address this disparity and cater to learners from various non technical fields enabling them to utilize machine learning effectively Adopting a hands on approach readers are guided through practical implementations using real datasets and SAS Enterprise Miner a user friendly data mining software that requires no programming Throughout the chapters two large datasets are used consistently allowing readers to practice all stages of the data mining process within a cohesive project framework This book also provides specific guidelines and examples on presenting data mining results and reports enhancing effective communication with stakeholders Designed as a guiding companion for both beginners and experienced practitioners this book targets a wide audience including students lecturers researchers and industry professionals from various backgrounds **Targeting Uplift** René Michel,Igor Schnakenburg,Tobias von Martens,2019-09-09 This book explores all relevant aspects of net scoring also known as uplift modeling a data mining approach used to analyze and predict the effects of a given treatment on a desired target variable for an individual observation After discussing modern net score modeling methods data preparation and the assessment of uplift models the book investigates software implementations and real world scenarios Focusing on the application of theoretical results and on practical issues of uplift modeling it also includes a dedicated chapter on software solutions in SAS R Spectrum Miner and KNIME which compares the respective tools This book also presents the applications of net scoring in various contexts e g medical treatment with a special emphasis on direct marketing and corresponding business cases The target audience primarily includes data scientists especially researchers and practitioners in predictive modeling and scoring mainly but not exclusively in the marketing context **Cases on Health Outcomes and Clinical Data Mining: Studies and Frameworks** Cerrito, Patricia,2010-02-28 Because so much data is now becoming readily available to investigate health outcomes it is important to examine just how statistical models are used to do this This book studies health outcomes research using data mining techniques Provided by publisher *IBM Technical Computing Clouds* Dino Quintero,Rodrigo Ceron Ferreira de Castro,Murali Dhandapani,Rodrigo Garcia da Silva,Amitava Ghosal,Victor Hu,Hua Chen Li,Kailash Marthi,Shao Feng Shi,Stefan Velica,IBM Redbooks,2013-10-28 This IBM Redbooks publication highlights IBM Technical Computing as a flexible infrastructure for clients looking to reduce capital and operational expenditures optimize energy usage or re use the infrastructure This book strengthens IBM SmartCloud solutions in particular IBM Technical Computing clouds with a well defined and documented deployment model within an IBM System x or an IBM Flex SystemTM This provides clients with a cost effective highly scalable robust solution with a planned foundation for scaling capacity resilience optimization automation and monitoring This book is targeted toward technical professionals consultants technical support staff IT Architects and IT Specialists responsible for providing cloud computing solutions and support **Guide to Intelligent Data Analysis** Michael R. Berthold,Christian Borgelt,Frank Höppner,Frank Klawonn,2010-06-23 Each passing

year bears witness to the development of ever more powerful computers increasingly fast and cheap storage media and even higher bandwidth data connections This makes it easy to believe that we can now at least in principle solve any problem we are faced with so long as we only have enough data Yet this is not the case Although large databases allow us to retrieve many different single pieces of information and to compute simple aggregations general patterns and regularities often go undetected Furthermore it is exactly these patterns regularities and trends that are often most valuable To avoid the danger of drowning in information but starving for knowledge the branch of research known as data analysis has emerged and a considerable number of methods and software tools have been developed However it is not these tools alone but the intelligent application of human intuition in combination with computational power of sound background knowledge with computer aided modeling and of critical reflection with convenient automatic model construction that results in successful intelligent data analysis projects Guide to Intelligent Data Analysis provides a hands on instructional approach to many basic data analysis techniques and explains how these are used to solve data analysis problems Topics and features guides the reader through the process of data analysis following the interdependent steps of project understanding data understanding data preparation modeling and deployment and monitoring equips the reader with the necessary information in order to obtain hands on experience of the topics under discussion provides a review of the basics of classical statistics that support and justify many data analysis methods and a glossary of statistical terms includes numerous examples using R and KNIME together with appendices introducing the open source software integrates illustrations and case study style examples to support pedagogical exposition This practical and systematic textbook reference for graduate and advanced undergraduate students is also essential reading for all professionals who face data analysis problems Moreover it is a book to be used following one s exploration of it Dr Michael R Berthold is Nycomed Professor of Bioinformatics and Information Mining at the University of Konstanz Germany Dr Christian Borgelt is Principal Researcher at the Intelligent Data Analysis and Graphical Models Research Unit of the European Centre for Soft Computing Spain Dr Frank H ppner is Professor of Information Systems at Ostfalia University of Applied Sciences Germany Dr Frank Klawonn is a Professor in the Department of Computer Science and Head of the Data Analysis and Pattern Recognition Laboratory at Ostfalia University of Applied Sciences Germany He is also Head of the Bioinformatics and Statistics group at the Helmholtz Centre for Infection Research Braunschweig Germany
