W. Gardner,1922 *Shades and Shadows* David C. Lange,2015-09-13 Here is a meritorious little work setting forth in clear fashion the principles of descriptive geometry and of shades and shadows The author has followed consistently his prefatory announcement of due consideration to the engineering point of view The information contained herein was compiled with special attention for its use as a text book on shades and shadows

Architectural students in many colleges receive their early training under engineering teachers An attempt was therefore made to serve such students by assuming the point of view of their engineering training at the beginning of the book and lead them by a study of shades and shadows toward an appreciation of the artistic architectural point of view so seldom developed in a strictly engineering course The illustrations are very numerous and adequately present the methods of descriptive geometry and shades and shadows A number of very pleasing architectural drawings some of them the work of students illustrate the applications of the methods and lend attractiveness and interest to the work Numerous problems are given at the ends of the various sections The final section treats briefly of wash rendering a subject on which there is the following interesting comment in the forepart of the book They often resort instead to mere copying to the use of shades and shadows merely guessed at and to a lavish rendering to cover mistakes The beauty and impressiveness of a drawing is more truthfully enhanced by the accurate casting of its shadows than by its rendering Engineering and Contracting Vol 55 1921

A Treatise on Shades and Shadows, and Linear Perspective Charles Davies, 1851 *Shades and Shadows* American School (Lansing, Ill.), 1905 *Shades and Shadows* David Christoph Lange, 1921 **A Treatise on Shades and Shadows, and Linear Perspective** Charles Davies, 2019-08-14 This is a reproduction of the original artefact Generally these books are created from careful scans of the original This allows us to preserve the book accurately and present it in the way the author intended Since the original versions are generally quite old there may occasionally be certain imperfections within these reproductions We re happy to make these classics available again for future generations to enjoy *Shades and Shadows* Victoria Pade, 1989-01-01 *A Text-book on Shades and Shadows, and Perspective* John Edward Hill, 1896 *Shades and Shadows (Classic Reprint)* David C. Lange, 2015-08-05 Excerpt from *Shades and Shadows* It has been the endeavor of the author to give in the following pages sufficient information to enable one to cast correctly the Shades and Shadows on any architectural object The information contained herein was compiled with special attention for its use as a text book on Shades and Shadows Architectural students in many colleges receive their early training under Engineering teachers An attempt was therefore made to serve such students by assuming the point of view of their engineering training at the beginning of the book and lead them by a study of Shades and Shadows toward an appreciation of the artistic architectural point of view so seldom developed in a strictly engineering course The author wishes to acknowledge his indebtedness to the Faculty of the Architectural School of the University of Pennsylvania where he received his first impressions and appreciation of Architecture and especially to Professor Thomas Nolan for his able assistance in a review of the subject matter contained in the book Also to those whose work is shown as illustrations About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish
