Additions to a Revision of the

Shark Genus Carcharhinus J. A. F. Garrick,1985 Features of the valid nominal species of Aprionodon Gill isodon

Valenciennes and Hypoprion M ller and Henle hemiodon Valenciennes macloiti M ller and Henle and signatus Poey plus those

of a previously unrecognized species here described as Carcharhinus leiodon n sp are examined and compared with those of

Carcharhinus Blainville Features studied include morphometrics vertebral numbers and other vertebral characteristics tooth

numbers color pattern and some other aspects of external morphology It is concluded that on these features C Leiodon n sp

is entirely encompassed within the parameters of Carcharhinus and that although A isodon H hemiodon H macloiti and H

signatus each extend the range of diversity of Carcharhinus in one or more features A isodon is not uniquely different from

Carcharhinus and there is no common pattern of difference between the three species of Hypoprion and Carcharhinus

Accordingly and because the nature of the teeth of Aprionodon and Hypoprion has been found insufficient to warrant generic

distinction from Carcharhinus the genera Aprionodon and Hypoprion are synonymised with Carcharhinus A diagnosis and

description are given for each of the above species The descriptions include measurements counts and line illustrations that show the whole shark in lateral view underside of head nostril and teeth The geographic distribution is summarized as are also the meager biological data available on number of embryos size at birth size at sexual maturity and maximum size
