**Description**

Installs on one host SAP Solution Manager 7.1 SR1 including software units

**Central System**  
The installation sets up the following instances on a single host.

- Central services instance for Java (SCS instance)
- Database instance
- Central instance

The central services instance is the main point of communication and synchronization for the application server instances and consists of the message server and the enqueue server. The SAP system software units AS ABAP and AS Java use their own database schema in the same database.

The central instance is the core component of an SAP system and usually provides all SAP system utilities.
