

## Configuration Steps in IDOC

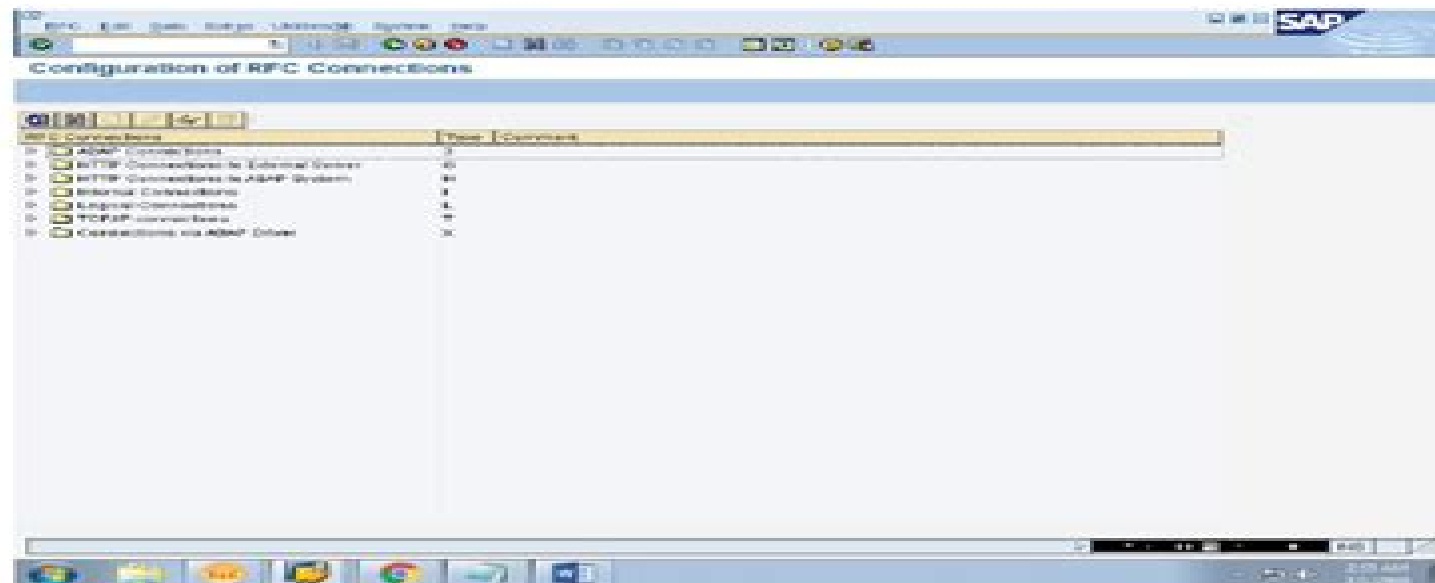

**IDOC or Intermediate Documents** are commonly used in case of data migration between SAP systems or between SAP and legacy system or vice versa. This blog details the steps involved in configuring a new IDOC and also list's down the various transactions that are used while working with IDOCs.

IDOCs can be classified into two . Inbound IDOCs and Outbound IDOCs.

**Inbound IDOC :** These are IDOCs which get the data into SAP system from external source i.e PI system or any other external system.

**Outbound IDOC:** These are IDOCs which are sent out from SAP system to any other system. i.e PI system or any other external system.

**Step 1 :** We need to check the RFC connections to the target system , it can be PI system or any external system. If it is to a PI system then we need to check the connection under ABAP connections in **SM59** transaction and for external system under HTTP Connections to External System.

**SAP Sd-Le - Configurations and Transactions** Yogi Kalra,2018-03-26 This manual written with the objective of providing detailed training to both consultants and users goes deep into the subject from initial configurations to covering the entire Order to Cash and logistics cycle The integration points of SD LE with Purchasing Inventory and Accounting are explained in detail and the chapters marked clearly if it is a Configuration C or Transaction U or both Since most of the book has been written in standard SAP once a company code is set up along with some basic configurations defined in the first few pages a SAP user if so desires can stay only with the areas marked U by passing the C since not everything in standard SAP depends on configurations Consultants or to be

consultants of course need to understand both sides of SAP The effects of changes done in configuration are immediately followed by their effect on the transactions thereby making the learning relational in real time for better understanding From the user s perspective not much from the subject has been left out in writing this manual and every effort has been taken to keep it relevant to the execution of order processing and logistics functions of day to day working on SAP in an orderly flow This manual is really a result of many years of training both consultants and business users The author appreciates your comments and suggestions on improving this book If I can be of any assistance in helping you understand the subject better or obtaining access to the system on which it was written for easier understanding please feel free to drop in a mail to shefariaentinc gmail com
