Saps Basic Trainees 2015

**Tom Lowrie, Robyn Jorgensen
(Zevenbergen)**

Saps Basic Trainees 2015:

Police Work and Identity Andrew Faull, 2017-09-07 This is a book about the men and women who police contemporary South Africa Drawing on rich original ethnographical data it considers how officers make sense of their jobs and how they find meaning in their duties It demonstrates that the dynamics that lead to police abuses and scandals in transitional and neo liberalising regimes such as South Africa can be traced to the day to day experiences and ambitions of the average police officer It is about the stories they tell themselves about themselves and their social worlds and how these shape the order they produce through their work By focusing on police officers this book positions the individual in primacy over the organisation asking what policing looks like when motivated by the pursuit of ontological security in precarious contexts It acknowledges but downplays the importance of police culture in determining officers attitudes and behaviour and reminds readers that most officers lives are entangled in and shaped by a range of social political and cultural forces It suggests that a job in the South African Police Service SAPS is primarily just that a job Most officers join the organisation after other dreams have slipped beyond reach their presence in the Service being almost accidental But once employed they re write their self narratives and enact carefully choreographed performances to ease managerial and public pressure and to rationalize their coercive practices In an era where evidence and what works reigns supreme and where cop culture is often deemed a primary socializing force this book emphasises how officers personal histories ambitions and vulnerabilities remain central to how policing unfolds on the street

Police Use of Force James F. Albrecht, Garth den Heyer, 2023-01-28 This volume provides a comprehensive examination and analysis of the concepts and issues related to police use of force particularly the use of deadly force with a firearm from multi faceted and international perspectives It explores innovative training protocols policies tactical options for de escalation and recommendations for the restriction of the use of force by law enforcement officers in an effort to reduce the likelihood of injury to police the public and criminal suspects Additionally it outlines tactics for effective crowd control at demonstrations and during riots This book specifically delineates practical policy implications suggested from highly recognized professionals with extensive experience in policing training and related research It is ideal for graduate and upper level undergraduate students scholars academics researchers government and community leaders and criminal justice and law enforcement administrators and policy makers

Police Integrity in South Africa Sanja Kutnjak Ivkovich, Adri Sauerman, 2020-04-29 Policing in South Africa has gained notoriety through its extensive history of oppressive law enforcement In 1994 as the country s apartheid system was replaced with a democratic order the new government faced the significant challenge of transforming the South African police force into a democratic police agency the South African Police Service SAPS that would provide unbiased policing to all the country s people More than two decades since the initiation of the reforms it appears that the SAPS has rapidly developed a reputation as a police agency beset by challenges to its integrity This book offers a unique perspective by providing in depth analyses of police integrity in

South Africa It is a case study that systematically and empirically explores the contours of police integrity in a young democracy Using the organizational theory of police integrity the book analyzes the complex set of historical legal political social and economic circumstances shaping police integrity A discussion of the theoretical framework is accompanied by the results of a nationwide survey of nearly 900 SAPS officers probing their familiarity with official rules their expectations of discipline within the SAPS and their willingness to report misconduct The book also examines the influence of the respondents race gender and supervisory status on police integrity Written in a clear and direct style this book will appeal to students and scholars of criminology policing sociology political science as well as to police administrators interested in expanding their knowledge about police integrity and enhancing it in their organizations

The Infrastructures of Security Martin Murray, 2022-08-15 Much of the South African government's response to crime especially in Johannesburg has been to rely increasingly on technology This includes the widespread use of video cameras Artificial Intelligence machine learning and automated systems effectively replacing human watchers with machine watchers The aggregate effect of such steps is to determine who is and isn't allowed to be in public spaces essentially another way to continue segregation In *The Infrastructures of Security* author Martin J Murray concentrates on not only the turn toward technological solutions to managing the risk of crime through digital and software based surveillance and automated information systems but also the introduction of somewhat bizarre and fly by night experimental answers to perceived risk and danger Digitalized surveillance is significant for two reasons first it enables monitoring to take place across wide geographical distances with little time delay and second it allows for the active sorting identification and tracking of bodies behaviors and characteristics of subject populations on a continuous real time basis These new software based surveillance technologies represent monitoring tracking and information gathering without walls towers or guards

The 1998/99 Labour Force Survey Report, 2003

Race and Crisis Suman Gupta, Satnam Virdee, 2020-05-21 As the European Union seemingly teetered from a financial crisis to an immigration crisis around 2015 and onwards discourses of race appeared to congeal in various member states In some instances these came with familiarly essentialist constructions in others these were refracted

cautiously through concerns about security national and cultural integrity distribution of public resources and employment and so on New political alignments surfaced on the back of such concerns and established organizations changed their agendas accordingly The border regimes of EU member states became increasingly fraught both in terms of their everyday operations and in terms of the close attention and vociferous debates they attracted In most instances the internal and external borders of the EU hardened and with increasing frequency the cohesion of the transnational union seemed on the verge of fracturing Indeed very real fissures opened up with secessionist moves and referendums Through each step in this juncture of upheavals the significance of race has been reiterated in tangential ways and sometimes with unabashed straightforwardness This volume explores this juncture around 2015 and the constructions of race and of crisis therein for specific contexts and from a range of disciplinary perspectives The introduction gives an overview of the juncture focusing on the rise of Eurosceptic nationalist political parties and their electoral success Subsequent chapters are addressed to the management and representation of immigrants crossing the Mediterranean border regimes in the Czech Republic the narratives that converged on Brexit riots in England antagonistic popular movements in Sweden racialization in crisis management in Italy perceptions of migrants in Greece and how race may be structured in and challenged through classroom pedagogy This book was originally published as a special issue of Ethnic and Racial Studies Teaching Secondary Biology 3rd Edition The Association For Science Education,2021-06-18 Enhance your teaching with expert advice and support for Key Stages 3 and 4 Biology from the Teaching Secondary series the trusted teacher s guide for NQTs non specialists and experienced teachers Written in association with ASE this updated edition provides best practice teaching strategies from academic experts and practising teachers Refresh your subject knowledge whatever your level of expertise Gain strategies for delivering the big ideas of science using suggested teaching sequences Engage students and develop their understanding with practical activities for each topic Enrich your lessons and extend knowledge beyond the curriculum with enhancement ideas Improve key skills with opportunities to introduce mathematics and scientific literacy highlighted throughout Support the use of technology with ideas for online tasks video suggestions and guidance on using cutting edge software Place science in context this book highlights where you can apply science theory to real life scenarios as well as how the content can be used to introduce different STEM careers Also available Teaching Secondary Chemistry Teaching Secondary Physics
