Seven Sisters Down Under English Edition:

Mystery Down Under Murray Stuart, 2023-12-01 This is a work of climate fiction set in Crocodile Dundee country in the Northern Territory of Australia. When the body of Alex Petersen, an employee of Parks Australia, is found at Gunlom Falls in Kakadu National Park, the Northern Territory Police are determined to uncover the truth behind his murder. Tensions are high between the Traditional Owners, government, and a global miner as the dispute over the environmental clean up of Ranger Uranium Mine continues. Meanwhile, there is a cover up of government funds behind a gas fracking mine on aboriginal land and a port too close to cultural sites in Darwin. An indignant paleo astronomy course field trip in Kakadu brings together a young Norwegian marine biologist, an astronomer from Edinburgh, and an archaeologist from Sydney. As the disparate group of characters navigates between the worlds of politics and culture, they uncover secrets that could explain the murder.

This book reminds us that novelty is more often in the eye of the beholder than the historical record. It also warns us that those who have forgotten past events are often fated to relive them and that second or third time round is rarely an improvement. Peter Scott, Professor of Higher Education Studies, Institute of Education, University of London, UK. This book aims to provide an authoritative account of the evolution of policy in British higher education, drawing extensively on previously untapped archival sources. It offers a comprehensive analysis of the policy drivers since 1945 and up to 2011 and of the extent to which even in the so-called golden age of university autonomy in the immediate post-war period the development of British higher education policy was closely integrated with government policies. In particular, it highlights how the role of the Treasury in determining the resource base for the expansion of student numbers is key to understanding many of the shifts in policy that occurred. This close engagement with government coupled with the historical acceptance of institutional autonomy defines the distinctiveness of the British higher education system as compared with other countries. What the book also shows, however, is that policy was rarely driven directly by Ministers but emerged out of inter-relationships between the Treasury, the responsible Department, the intermediary bodies, the higher education representative bodies and the research communities. The policy process was interactive rather than directed. The conclusions offer a new interpretation of the development of British higher education. Warraparna Kurna! Rob Amery, 2016-02-22. This book tells the story of the renaissance of the Kurna language, the language of Adelaide and the Adelaide Plains in South Australia, principally over the earliest period up until 2000 but with a summary and brief discussion of developments from 2000 until 2016. It chronicles and analyses the efforts of the Nunga community and interested others to reclaim and relearn a linguistic heritage on the basis of mid-nineteenth century materials. This study is breaking new ground. In the Kurna case, very little knowledge of the language remained within the Aboriginal community. Yet the Kurna language has become an important marker of identity and a means by which Kurna people can further the struggle for recognition, reconciliation and liberation. This work challenges widely held beliefs as to what is possible in language revival and questions notions about the very nature of language and its development. **Central Asia in 1993: When the Silk Road Reopened** Richard Pomfret, 2015-01-10. On Christmas Day 1991, the Soviet Union disappeared and five unprepared Central Asian republics became nation states. In December 1992, the author was seconded to the United Nations as an economic advisor to the five countries and to Azerbaijan and Mongolia, which were also in transition from central planning. This book tells the story of the following year in Central Asia. The Central Asian oases were key points on the silk road from China to West Asia and to Europe until maritime explorers opened up sea routes that led to several centuries of decline in the region. Conquered by Russia in the nineteenth century and under Communism isolated from the world in the twentieth century, the early 1990s brought dramatic new challenges for the people in the midst of economic and political chaos. The rich history, Islamic traditions and uncertain future made 1993 an interesting year in Central Asia. *Congressional Record* United States.
