

## Mode Switching Summary

*Move ON-TIME Switch to 1, 5, or 10 minutes*

*Flip light switch off for one second then back on\**

\* If you get confused while switching modes, turn the power off for one minute, then back on. After the calibration time the control will be in the AUTO mode.

## INSTALLATION

For easy installation, select an existing light operated by a wall switch for replacement.

For best performance, mount the fixture about 8 feet (2.4 m) above the ground. **NOTE:** If fixture is mounted higher than 8 ft. (2.4 m), aiming the sensor down will reduce coverage distance.

- ☐ Drill the holes needed to mount the backplate to the junction box.

**Eave Mount**

**Wall Mount**

For under eave installation, the sensor head **must** be rotated as shown in the next two steps for proper operation and to avoid the risk of electrical shock.

For eave mount only:

- ☐ Swing the sensor head towards the clamp screw joint.

- ☐ Then rotate the sensor head clockwise 180° so the controls face down.

If the sensor pops out of the ball joint, loosen the clamp screw and push the sensor back into the ball joint. Tighten the clamp screw when done.
