Think! Eat! Act! Raffaella Tolicetti, 2014-05-23. Think Eat Act is a cookbook featuring the vegan food prepared on the Sea Shepherd ships' anti-whaling campaigns. Inspired by the Sea Shepherd's goal of protecting the animals that are victims of human cruelty, author and onboard chef Raffaella Tolicetti uses delicious vegan food to show readers that every action has a consequence and that you can live both well and compassionately even while facing the challenges of being an activist living on a ship. The recipes are mixed in with information about vegan nutrition and ocean activism and interviews about being on the front lines of animal defense, getting vegan food in prison and more.

**Shark** Mark Carwardine, 2004. Sharks in one form or another have inhabited our seas and oceans for more than 400 million years. They were here long before the dinosaurs and they witnessed the rise of our own species. Awe-inspiring, beautiful, mysterious, frightening, sharks have been described in many ways and provoke a mixture of feelings. But they never do less than excite and impress. Story of these wonderful creatures from their early beginnings to their struggle for survival today. He describes their origins and ancestors, introduces the diversity of sharks, marvels at their perfectly designed bodies, explains how they reproduce, investigates their reputation as the ultimate killing machines and finds out how these little-known animals are being studied. He even reveals how and where to jump into the sea for a real-life close encounter with a wild shark. Of course, the fearsome reputation of sharks travels before them. But how much truth is there in the fishermen's tales that have circulated for centuries? Mark puts our irrational fears into perspective by presenting the facts and exploding the fallacies. Far from being killing machines with a taste for human flesh, most sharks are quite nervous of people. There would be many more attacks if they really were out to get us. We pose a far greater threat to sharks than they do to us. According to the most widely accepted scientific estimate, over 100 million sharks are killed by people every year.

cultural psyche While sharks have played a prominent part in religion and mythology they are more commonly perceived as deadly predators in such films as Jaws and Dr No or as symbols of natural violence as in Hemingway s Islands in the Stream Shark ultimately argues however that our ill informed emotional responses spurred by such representations have encouraged the wholesale slaughter of sharks and our ignorance endangers the very existence of the shark today Both a celebration of their lethal beauty and plea for their conservation Shark urges us to shed our fears and appreciate the magnificence of this majestic animal
