SPECIALLY DESIGNED to meet the more exacting requirements of those who wish to employ tape recording for the teaching of music, drama, foreign languages or other educational purposes—in addition, of course, to normal recreational use and industrial purposes—the new Brenell Mark 5 Series 3 has a choice of four speeds and many other additional features of considerable value.

Indeed, as one studies the specification shown overleaf, it becomes obvious that no effort has been spared to ensure that the quality of reproduction attains a very high level.

Frequency correction is automatically applied at all tape speeds (15, 7½, 3½, 1½), by means of a four-position switch. This ensures that the correct play-back characteristic—is

essential for optimum fidelity—is always available. The ultra-efficient sound-heads—the carefully designed oscillator circuit—the application of negative feedback to secure a uniform level throughout the wide frequency band—the use of a large internal elliptical speaker of high flux density—all these play their part in permitting the attainment of a standard of performance which will never fail to delight the most critical ear.

Finally, because it is realized that such a versatile instrument will be subjected to long and arduous service, Brenell engineers have developed a unit assembly system which, by permitting the instant disconnection of any of its several units, makes internal inspection, lubrication, adjustment or valve renewal, quick and easy operations.
