The resources provided in this book aim to help teachers make the Common Core State Standards work for them. Teachers, departments, professional learning communities, schools, and districts all play a role in implementing the CCSS, and whether individual teachers use this book to help achieve their own goals for integrating the standards into their classrooms or entire districts use it, it is a resource to train teachers and administrators in how to implement the standards, create quality Common Core aligned assessments, and track student mastery of the standards. psychology as well as the history and philosophy of science to make its case for transforming the way science is taught. Re thinking the Way We Teach Science addresses major themes in national reform documents and movements: how to place students at the center of what happens in the classroom; how to shift the focus from giving answers to building arguments; how to move beyond narrow disciplinary boundaries to integrated explorations of ideas and issues that connect directly with students; and most especially, the importance of engaging students in discussions of an interactive and explanatory character. Deeply anchored in the classroom, highly interactive and relevant across grade levels and subject matter, above all this is a book about choosing to place the authority of reason over that of right answers.
