**Hymns and Constructions of Race** Erin Johnson-Williams, Philip Burnett, 2024-02-07 Hymns and Constructions of Race Mobility Agency De Coloniality examines how the hymn historically and today has reinforced negotiated and resisted constructions of race It brings together diverse perspectives from musicology ethnomusicology theology anthropology performance studies history and postcolonial scholarship to show how the hymn has perpetuated generated and challenged racial identities The global range of contributors cover a variety of historical and geographical contexts with case studies from China and Brazil to Suriname and South Africa They explore the hymn as a product of imperialism and settler colonialism and as a vehicle for sonic oppression and or resistance within and beyond congregational settings The volume contends that the lived tradition of hymn singing with its connections to centuries of global Christian mission is a particularly apt lens for examining both local and global negotiations of race power and identity It will be relevant for scholars interested in religion music race and postcolonialism [Catalog of Copyright Entries](#) Library of Congress. **African Musics in Context** Solomon, Thomas, 2015-12-12 Ethnomusicology deals with the study of the music of the world The field is interdisciplinary and ethnomusicologists draw on theory and method from folklore cultural anthropology historical musicology literature cultural studies and media studies among other disciplines So when ethnomusicologists met at Makerere University's symposium on ethnomusicology in October 2011 the issues dealt with spanned a wide spectrum of concerns which can be grouped under three major categories Institutions culture and identity African Musics in Context discusses the place of performing arts in Ugandan society archiving music and music sources performing archival music performing health and religious issues in music music and identity in East Africa as well music in motion which tackles how identity shifts when people move from one place to another All these are key aspects of our day to day lives and they are the themes that colour the music we listen to This book follows up on and extends work in an earlier volume Nannyonga Tamusuza and Solomon 2012 which included papers from the first symposium in the series While this book focuses primarily on music and music research in Uganda the chapters by the contributors from Tanzania South Africa and Norway demonstrate the importance of scholarly and professional networks that connect the different countries of the African continent with each other and with the larger international scholarly community If the published proceedings from the first symposium mentioned above represented a first in the history of ethnomusicological publishing in Uganda this second book in the series shows that professionalised ethnomusicology in Uganda continues to gain ground and make contributions to music research in Uganda Africa and the global ethnomusicological community The chapters collected here show that ethnomusicology in Uganda has a healthy institutional basis and promises to continue to make contributions that
