shrieks out wrote playwright John Webster in 1623 and our fascination with murder and murder trials has continued unabated to the present Murder is after all the most dramatically unlawful thing a person can do to another It runs counter to the very fundamentals of human society breaching what social philosophers have termed the social contract Society speaks with its firmest voice in addressing the conduct of its members who kill another and murder prosecutions have the direst of consequences of any court proceeding as they may occasion the loss of a violator's liberty for life or even the loss of his or her life itself But most murder cases while fascinating in the motives or personalities of the killers or the circumstances of the killings and the ensuing trials receive little attention and recede into ordinariness Only rarely does a murder case become a cause célèbre notorious enough to capture wide attention the O J Simpson Scott Peterson Claus von Bülow type cases prove the exception rather than the rule For the most part the public's perception of garden variety murder trials quickly becomes only memory's ashes strewn sparsely on the fields of public awareness Brought to life by the prosecutor who tried the six everyday murders narrated here three in Manhattan and three in San Francisco these true stories prove redolent with drama encapsulating raw human emotions that often impel man to murder greed lust jealousy hatred as well as mere folly and actually are quite extraordinary in their own context Sit at the prosecution's table with masterful prosecutor Hugh Anthony Levine as he represents the People of the State of New York or the People of the State of California in the trials of some everyday murders

Legal Evidence and Proof Henry Prakken, Hendrik Kaptein, 2016-04-22 As a result of recent scandals concerning evidence and proof in the administration of criminal justice ranging from innocent people on death row in the United States to misuse of statistics leading to wrongful convictions in The Netherlands and elsewhere inquiries into the logic of evidence and proof have taken on a new urgency both in an academic and practical sense This study presents a broad perspective on logic by focusing on inference not just in isolation but as embedded in contexts of

procedure and investigation With special attention being paid to recent developments in Artificial Intelligence and the Law specifically related to evidentiary reasoning this book provides clarification of problems of logic and argumentation in relation to evidence and proof As the vast majority of legal conflicts relate to contested facts rather than contested law this volume concerning facts as prime determinants of legal decisions presents an important contribution to the field for both scholars and practitioners **The Jane Doe Murders** Philip B.
