Hardy, 2007 This is a reading of physical obsession in O Connor through linguistic and literary techniques This work extends the innovative thesis that it is possible to grasp the central struggle between spirit and matter in O Connor through a close quantitative examination of the interactions of grammatical voice and physical bodies in her texts Bridging literary theory and linguistics Hardy demonstrates that the many constructions in which the body parts of O Connor's characters are foregrounded either as subjects or objects are grammatical manipulations of semantic variations on what linguists deem the middle voice roughly indicating that the subject is acting upon himself or herself Hardy combines computational and linguistic methodology to provide a productive approach to understanding O Connor's use of the body and its parts in her explorations of the sacramental and the grotesque Linguistic analysis of grammatical middle voice is coupled with quantitative analysis of body part words and the collocations in which they appear to present a new point of entrance to understanding O Connor's stylistic manipulations of the body as central to the rift between spirit and matter Through this method of reading O Connor Hardy makes a valuable contribution to the growing body of work that is introducing linguistic terminology and concepts into literary studies The Picturesque John Macarthur, 2013-03-07 In this fresh and authoritative account John Macarthur presents the eighteenth century idea of the picturesque when it was a risky term concerned with a refined taste for everyday things such as the hovels of the labouring poor in the light of its reception and effects in modern culture In a series of linked essays Macarthur shows what the concept of picture does in the picturesque and how this relates to modern theories of the image how the distaste that might be felt today at the sentimentality of the picturesque was already at play in the eighteenth century how visual values such as irregularity become the basis of modern architectural planning how the concept of appropriating a view moves from landscape design into urban design why movement is fundamental to picturing the stillness of buildings cities and landscapes Drawing on examples from architecture art and broader culture John Macarthur's account of this key topic in cultural history
