The Collapse Of Complex Societies:

The Collapse of Complex Societies Joseph Tainter, 1988 Dr Tainter describes nearly two dozen cases of collapse and reviews more than 2000 years of explanations He then develops a new and far reaching theory *The Collapse of Complex Societies* Joseph A. Tainter, 1997 The Prophets of Doom Neema Parvini, 2023-07-27 Linear and progressive views of history have dominated the popular imagination for the past seventy years in a worldview wedded to the inexorable rise of globalisation and GDP growth at any cost However the end of the Cold War failed to produce the end of history as hoped a fact brought home to many by Russia's invasion of Ukraine in 2022 Material wealth and Progress in the name of social justice have not made people happier or more united but quite the opposite Anxiety depression fearfulness sadness loneliness and anger have all massively increased since 1970 with the male suicide rate at an all time high Western society seems to be divided against itself across every line conceivable left versus right women versus men non whites versus whites globalists versus populists the elites versus the people people who think that men can be women and vice versa versus those who insist that they cannot and so on Seventy three percent of Americans believe their country is on the wrong track with similar views reflected in Britain and across Europe *The Prophets of Doom* explores eleven thinkers who not only dared to contradict the dominant linear and progressive view of history but also predicted many of the political and social maladies through which we are living *Current Issues in Transitional Justice* Natalia Szablewska, Sascha-Dominik Bachmann, 2014-10-27 This volume is an inter disciplinary scholarly resource bringing together contributions from writers experienced academics and practitioners working in fields such as human rights humanitarian law public policy psychology cultural and peace studies and earth jurisprudence This collection of essays presents the most up to date knowledge and status of the field of transitional justice and also highlights the emerging debates in this area which are often overseen and underdeveloped in the literature The volume provides a wide coverage of the arguments relating to controversial issues emanating from different regions of the world The book is divided into four parts which groups different aspects of the problems and issues facing transitional justice as a field and its processes and mechanisms more specifically Part I concentrates on the traditional means and methods of dealing with past gross abuses of power and political violence In this section the authors also expand and often challenge the ways that these processes and mechanisms are conceptualised and introduced Part II provides a forum for the contributors to share their first hand experiences of how traditional and customary mechanisms of achieving justice can be effectively utilised Part III includes a collection of essays which challenges existing transitional justice models and provides new lenses to examine the formal and traditional processes and mechanisms It aims to expose insufficiencies and some of the inherent practical and jurisprudential problems facing the field Finally Part IV looks to the future by examining what remedies can be available today for abuses of rights of the future generations and those who have no standing to claim their rights such as the environment *Future Survey Annual 1988-1989* Michael Marien, Lane Jennings, 1990-01-01 BMW Z

Planet in Distress Scott Christiansen,2012 There s no denying it our world just isn t what it used to be Natural disasters happen more often and with great magnitude Our oceans have been polluted and overfished Our lands have been deforested saturated with potent chemicals and abandoned to erosion when they are no longer productive Our atmosphere is fully of greenhouse gasses and climate change is a deadly reality Water is increasingly in short supply worldwide Why exactly have these things happened and so quickly What are we as Christians supposed to do about them now How does the current condition of our world fit with the events Jesus described in Matthew 24 6 8 Scott Christiansen explores scientific evidence concerning the rapid decline of global systems climate food production water energy finance etc and blends it with what the Bible and inspired writings have to say about the end of time His findings are a wake up call Book jacket

Water Management in New Zealand's Canterbury Region Bryan R. Jenkins,2018-01-06 The book is designed to achieve two major purposes The first is to describe the developments in water management policy in the Canterbury Region of New Zealand The strategic approach the collaborative engagement and the nested adaptive systems approach represent a paradigm shift in water management in New Zealand The second is to delineate the sustainability framework that underpins the Canterbury approach The framework is based on the concept of developing sustainability strategies to address critical failure pathways While the focus of the book is on Canterbury comparative applications of the framework to issues in other parts of New Zealand and international issues are proposed The book can be used in at least two ways The first is the application of a sustainability framework to the management of water in Canterbury region The second is the exposition of a sustainability framework that can be applied to the management of water in a region with the application to Canterbury as an illustrative case study

Impasse Roy Scranton,2025-08-05 A Next Big Idea Club Must Read for August 2025 We need a new realism in the face of global climate catastrophe Extreme heat fires floods and storms are transforming our planet Yet instead of serious responses from world leaders we get increasing emissions divisive politics and ersatz solutions that offer more of the same more capitalism more complexity more progress The impasse we face is not only

political and institutional but cognitive existential and narrative We re incapable of grasping the scale speed and impact of global warming Our brains can t make sense of how radically our world is changing And we optimistically cling to a civilizational narrative that promises a better tomorrow if we just keep doing what we re doing It s well past time Roy Scranton argues to free ourselves from our dangerous and dogmatic faith in progress Such unwarranted optimism will only accelerate our collective disintegration If we want to have any hope at all for the future it must be grounded in a recognition of human limits a view Scranton calls ethical pessimism Drawing from psychology philosophy history and politics as well as film literature and personal experience Scranton describes the challenges we face in making sense of our predicament from problems in communication to questions of justice from the inherent biases in human perception to the difficulties of empirical knowledge What emerges is a challenging but ultimately hopeful proposition if we have the courage to accept our limits we may find a way to embrace our unknowable future
