Early Twentieth-Century Continental Philosophy Leonard Lawlor, 2011-12-01 An outstanding book that will serve as a fine supplement and guide to important primary texts in early twentieth century continental philosophy Notre Dame Philosophical Reviews Early Twentieth Century Continental Philosophy offers a lucid and engaging introduction to the major works of French and German philosophy in the first half of the century Leonard Lawlor takes as his starting point the original publication of Bergson's Introduction to Metaphysics in 1903 and his endpoint as the original publication Foucault's The Thought of the Outside in 1966 Lawlor interprets key texts by major figures in the continental tradition such as Bergson and Foucault as well as Freud Heidegger Husserl and Merleau Ponty Taken together his assessment of these figures illustrates the major theoretical trends of the time immanence difference multiplicity and the overcoming of metaphysics *Dialogues with Contemporary Continental Thinkers* Richard Kearney, 1984 *Catalog of Catalogs: A Bibliography of Temporary Exhibition Catalogs Since 1876 that Contain Items of Judaica* William Gross, Orly Tzion, Falk Wiesemann, 2019-09-16 Catalog of Catalogs provides a comprehensive index of nearly 2 300 publications documenting the exhibition of Judaica over the past 140 years This vast corpus of material ranging from simple leaflets to scholarly catalogs contains textual and visual material as yet unmined for the study of Jewish art religion culture and history Through highly detailed fully indexed catalog entries William Gross Orly Tzion and Falk Wiesemann elucidate some 2 000 subjects geographical locations and Judaica objects ceremonial objects illuminated manuscripts printed books synagogues cemeteries et al addressed in these catalogs Descriptions of the catalog's bibliographic components contributors exhibition history and contents all accessible through the volume's five indices render this volume an unparalleled new resource for the study of Jewish Art culture and history A Friendship That Lasted a Lifetime Gerhard Wagner, Gilbert Weiss, 2011-02-21 Scholarly correspondence can be as insightful as scholarly work itself as it often documents the motivating forces of its writers intellectual ideas while illuminating their lives more clearly The more complex the authors scholarly works and the more troubled the eras in which they lived the more substantial and potentially fascinating their correspondence This is especially true of the letters between Alfred Schutz 1899 1959 and Eric Voegelin 1901 1985 The scholars lived in incredibly dramatic times and produced profound complex works that continue to confound academics The communication between these two giants of the social sciences as they sent their thoughts to one another was crucial to the work of both men A Friendship That Lasted a Lifetime The Correspondence between Alfred Schutz and Eric Voegelin demonstrates that Schutz and Voegelin shared a remarkable friendship they first met as students in Vienna in the 1920s and found themselves great partners in discussion years later they were pushed out of Europe by Nazi pressure and went to work at separate American universities For twenty years they wrote each other developing their respective scientific works in that dialogue The letters bear witness to their friendship during the years they spent in exile in the United States and they document the men's tentative attempts at formulating the theories of lifeworld

and gnosis associated with Schutz and Voegelin today The entire collection of 238 letters was printed in German in 2004 but this edited volume is the first to present their correspondence in English and offers a selection of the most important letters those that contributed to the thinkers theoretical discussions and served as background to their most significant thoughts Editors Gerhard Wagner and Gilbert Weiss do not analyze Schutz's and Voegelin's works in light of the correspondence rather they present the collection to create a framework for new interpretations A Friendship That Lasted a Lifetime takes a unique look at two major social scientists This volume is a valuable resource in the study of Voegelin's political philosophy and Alfred Schutz's contribution to American sociology and marks an important addition to the literature on these remarkable men Showing how scholarly discourse and the dialogue of everyday life can shed light on one another the book finally presents this correspondence for an American audience and is not to be missed by scholars of philosophy and sociology

Mathematics and Art Lynn Gamwell,2016 This is a cultural history of

mathematics and art from antiquity to the present. Mathematicians and artists have long been on a quest to understand the physical world they see before them and the abstract objects they know by thought alone. Taking readers on a tour of the practice of mathematics and the philosophical ideas that drive the discipline, Lynn Gamwell points out the important ways mathematical concepts have been expressed by artists. Sumptuous illustrations of artworks and cogent math diagrams are featured in Gamwell's comprehensive exploration. Gamwell begins by describing mathematics from antiquity to the Enlightenment, including Greek, Islamic, and Asian mathematics. Then focusing on modern culture, Gamwell traces mathematicians' search for the foundations of their science, such as David Hilbert's conception of mathematics as an arrangement of meaning-free signs, as well as artists' search for the essence of their craft, such as Aleksandr Rodchenko's monochrome paintings. She shows that self-reflection is inherent to the practice of both modern mathematics and art and that this introspection points to a deep resonance between the two fields. Kurt Gödel posed questions about the nature of mathematics in the language of mathematics, and Jasper Johns asked, "What is art in the vocabulary of art?" Throughout, Gamwell describes the personalities and cultural environments of a multitude of mathematicians and artists, from Gottlob Frege and Benoît Mandelbrot to Max Bill and Xu Bing. *Mathematics and Art* demonstrates how mathematical ideas are embodied in the visual arts and will enlighten all who are interested in the complex intellectual pursuits, personalities, and cultural settings that connect these vast disciplines.

Publishers' Circular and Booksellers' Record of British and Foreign Literature, 1896 Public Policy and Program Evaluation Evert Vedung, 2017-07-12 Evaluation is a controversial and little-understood strategy of public governance, control, and decision-making. As early as classical antiquity, scholars were summoned to court to counsel kings. Public policy and program evaluation is a recent addition to the great chain of attempts to use the brainpower of scholars and scientists to further the interests of the state. Evaluation scholars are asked to provide retrospective assessments of the implementation, output, and outcome of government measures in order to effect deeper understanding and well-grounded decisions on the part of those in charge of government operations. Evaluation is the process of distinguishing the worthwhile from the worthless, the precious from the useless; evaluation implies looking backward in order to be able to steer forward better. Written from a political science perspective, *Public Policy and Program Evaluation* provides an overview of the possibilities and limits of public sector evaluation. Evert Vedung examines evaluation as a mechanism for monitoring, systematizing, and grading government activities and their results so that public officials in their future-oriented work will be able to act as responsibly, creatively, and efficiently as possible. Topics discussed include Evaluation, Rationality, and Theories of Public Management Models of Evaluation, Internal or

The Eight Problems Approach to Evaluation and Uses and Users of Evaluation All evaluation rests upon the idea that perceptions opinions intentions judgments in short everything concerned with the world of human consciousness play such interesting roles in political and administrative action that their functions are worth investigating Through experience humans may learn from past actions The interventions of the modern state are so extensive their execu Science in Culture Peter Louis Galison, Stephen Richards Graubard, Everett Mendelsohn, Twenty five years ago Gerald Holton s Thematic Origins of Scientific Thought introduced a wide audience to his ideas Holton argued that from ancient times to the modern period an astonishing feature of innovative scientific work was its ability to hold simultaneously deep and opposite commitments of the most fundamental sort Over the course of Holton s career he embraced both the humanities and the sciences Given this background it is fitting that the explorations assembled in this volume reflect both individually and collectively Holton s dual roots In the opening essay Holton sums up his long engagement with Einstein and his thematic commitment to unity The next two essays address this concern In historicized form Lorraine Daston returns the question of the scientific imagination to the Enlightenment period when both sciences and art feared imagination Daston argues that the split whereby imagination was valued in the arts and loathed in the sciences is a nineteenth century divide James Ackerman on Leonardo da Vinci meshes perfectly with Daston s account showing a form of imaginative intervention where it is irrelevant to draw analogies between art and science Historians of religion Wendy Doniger and Gregory Spinner pursue the imagination into the bedroom with literary theological representations Science culture and the imagination also intersect with biologist Edward Wilson and physicist Steven Weinberg Both tackle the big question of the unity of knowledge and worldviews from a scientific perspective while art historian Ernst Gombrich does the same from the perspective of art history To emphasize the nitty gritty of scientific practice chemists Bretislav Fredrich and Dudley Herschback provide a remarkable historical tour at the boundary of chemistry and physics In the concluding essay historian of education Patricia Albjerg Graham addresses pedagogy head on In these various reflections on science art literature philosophy and education this volume gives us a view in common a deep and abiding respect for Gerald Holton s contribution to our understanding of science in culture Peter Galison is Mallinckrodt Professor of History of Science and of physics at Harvard University Stephen R Graubard is editor of the American Academy of Arts and Sciences and its journal Daedalus and professor of history emeritus at Brown University Everett Mendelsohn is director of the History of Science Program at Harvard University

Jews in China Irene Eber, 2019-11-12 Irene Eber was one of the foremost authorities on Jews in China during the twentieth and twenty first centuries a field that in contrast to the study of the Jewish diaspora in Europe and the Americas has been critically neglected This volume gathers fourteen of Eber s most salient articles and essays on the exchanges between Jewish and Chinese cultures making available to students scholars and general readers a representative sample of

the range and depth of her important work in the field of Jews in China. *Jews in China* delineates the centuries long reciprocal dialogue between Jews, Jewish culture and China all under the overarching theme of cultural translation. The first section of the book sets forth a sweeping overview of the history of Jews in China beginning in the twelfth century and concluding with a detailed assessment of the two crucial years leading up to the Second World War. The second section examines the translation of Chinese classics into Hebrew and the translation of the Hebrew Bible into Chinese. The third and final section turns to modern literature bringing together eight essays that underscore the cultural reciprocity that takes place through acts of translation. The centuries long relationship between Judaism and China is often overlooked in the light of the extensive discourse surrounding European and American Judaism. With this volume Eber reminds us that we have much to learn from the intersections between Jewish identity and Chinese culture.
