Energetic Materials, 2003-11-25 This volume provides an overview of current research and recent advances in the area of energetic materials focusing on decomposition, crystal and molecular properties. The contents and format reflect the fact that theory, experiment and computation are closely linked in this field. Since chemical decomposition is of fundamental importance in energetic performance, this volume begins with a survey of the decomposition processes of a variety of energetic compounds. This is followed by detailed studies of certain compounds and specific mechanisms such as nitro aci nitro tautomerism. Chapter 6 covers the transition from decomposition to crystal properties with molecular dynamics being the primary analytical tool. The next several chapters deal with different aspects of the crystalline state, again moving from the general to particular. There is also a discussion of methods for computing gas, liquid and solid phase heats of formation. Finally, the last portion of this volume looks at the potential of high nitrogen molecules as energetic systems; this has been of considerable interest in recent years. Overall, this volume illustrates the progress that has been made in the field of energetic materials and some of the areas of current activity. It also indicates the challenges involved in characterizing and understanding the properties and behaviour of these compounds. The work is a unique state of the art treatment of the subject, written by pre-eminent researchers in the field. Overall emphasis is on theory and computation presented in the context of relevant experimental work. Presents a unique state of the art treatment of the subject. Contributors are pre-eminent researchers in the field.

Forensic Applications of High Performance Liquid Chromatography Shirley Bayne, Michelle Carlin, 2017-07-27 Chromatography has many roles in forensic science ranging from toxicology to environmental analysis. In particular, high performance liquid chromatography (HPLC) is a primary method of analysis in many types of laboratories. Maintaining a balance between practical solutions and the theoretical considerations involved in HPLC analysis. Forensic App.

Molecules That Amaze Us Paul May, Simon Cotton, 2014-10-23 This new book is by two knowledgeable and expert popularizers of chemistry and deals exclusively with molecules and compounds rather than with the simpler atoms and elements. It is based on the very successful Molecule of the Month website that was begun by Paul May fifteen years ago and to which his co-author Simon Cotton has been a frequent co.

Technology and Terrorism Paul Wilkinson, 2012-12-06 This volume will be of interest to all students of terrorism, policymakers and security practitioners involved in combating terrorism from government officials, law enforcement, military and intelligence agencies to specialists in industrial security including the aviation and nuclear power sectors.

Computational Science and Its Applications -

ICCSA 2004 Antonio Laganà, Marina L. Gavrilova, Vipin Kumar, Youngsong Mun, C.J. Kenneth Tan, Osvaldo Gervasi, 2004-05-21 The natural mission of Computational Science is to tackle all sorts of human problems and to work out intelligent automata aimed at alleviating the burden of working out suitable tools for solving complex problems For this reason Computational Science though originating from the need to solve the most challenging problems in science and engineering computational science is the key player in the fight to gain fundamental advances in astronomy biology chemistry environmental science physics and several other scientific and engineering disciplines is increasingly turning its attention to all fields of human activity In all activities in fact intensive computation information handling knowledge synthesis the use of ad hoc devices etc increasingly need to be exploited and coordinated regardless of the location of both the users and the various and heterogeneous computing platforms As a result the key to understanding the explosive growth of this discipline lies in two adjectives that more and more appropriately refer to Computational Science and its applications interoperable and ubiquitous Numerous examples of ubiquitous and interoperable tools and applications are given in the present four LNCS volumes containing the contributions delivered at the 2004 International Conference on Computational Science and its Applications ICCSA 2004 held in Assisi Italy May 14-17 2004 **Hazardous Materials Chemistry for Emergency Responders, Third Edition** Robert Burke, 2013-06-17 The third edition of a bestseller Hazardous Materials Chemistry for Emergency Responders continues to provide the fundamentals of street chemistry required by emergency response personnel Emergency response and hazmat expert Robert Burke takes the basics of chemistry appropriate for response personnel and puts it into understandable terms The author has retained the style and format that made the previous editions so popular while updating the information to keep the book relevant See What's in the Third Edition Expanded section on Ethanol and its hazards to responders Update of NFPA 472 Chemistry requirements Revised section on hazmat elements with more hazards and response issues Includes a focus on the importance of the hazmat elements of chemical families New incident examples New photographs and graphics The chapters are organized by the nine U.S. Department of Transportation's hazard classes Almost every hazardous material presents more than one hazard the DOT's placarding and labeling system only identifies the most severe hazards Therefore the book provides additional information about hidden hazards for each hazard class It discusses individual chemicals their hazards and their physical and chemical characteristics both as distinct chemicals and within chemical families The book offers a concise presentation of the topics of most importance to emergency responders on a day to day basis It provides the basic chemistry a responder needs to understand chemical terminology and communicate with others about the chemicals involved in hazardous materials incidents **Demystifying Explosives** Sethuramasharma Venugopalan, 2015-01-09 Demystifying Explosives Concepts in High Energy Materials explains the basic concepts of and the science behind the entire spectrum of high energy materials HEMs and gives a broad perspective about all types of HEMs and their interrelationships Demystifying Explosives covers
