The Creation Effect:

The Creation of Scientific Effects Jed Z. Buchwald, 2011-01-15 This book is an attempt to reconstitute the tacit knowledge the shared unwritten assumptions values and understandings that shapes the work of science Jed Z Buchwald uses as his focus the social and intellectual world of nineteenth century German physics Drawing on the lab notes published papers and unpublished manuscripts of Heinrich Hertz Buchwald recreates Hertz s 1887 invention of a device that produced electromagnetic waves in wires The invention itself was serendipitous and the device was quickly transformed but Hertz s early experiments led to major innovations in electrodynamics Buchwald explores the difficulty Hertz had in reconciling the theories of other physicists including Hermann von Helmholtz and James Clerk Maxwell and he considers the complex and often problematic connections between theory and experiment In this first detailed scientific biography of Hertz and his scientific community Buchwald demonstrates that tacit knowledge can be recovered so that we can begin to identify the unspoken rules that govern scientific practice

Kant and the Creation of Freedom Christopher J. Insole, 2013-05-30 Kant is a key thinker in the emergence of our contemporary sense of what human freedom is and why it is important This book shows that important features of Kant s philosophy were forged out of difficulties he had in reconciling his belief in God as creator with the concept of human freedom

When Co-Creation Leads to Love Melanie Oßwald, 2025-07-30 Innovating organizations struggle to select suitable co creators and their ideas Co creating market relevance is challenging as one s own contributions often lead to evaluation biases such as the IKEA Effect When Labor Leads to Love the foundation of this book Transcending organizational boundaries requires transcending individual evaluation Intersubjectivity is essential for this step This work suggests using intersubjectivity as a concept for more efficient open innovation beyond individual biases The exploratory sequential research design aims to develop a comprehensive understanding of evaluation biases and the concept of intersubjectivity in open innovation It begins with qualitative inquiry including a narrative literature review and expert interviews followed by the identification and empirical testing of novel intersubjectivity related variables through laboratory and field experiments In addition to its theoretical implications this book presents a typology of contexts requiring intersubjectivity and provides a working model to guide organizations and intermediaries in their co creation practices
