

What happens when a solution is evaporated?

The photographs show the first steps in cooking some pasta.

A – Salt is added and stirred.

B – The water boils and some of it evaporates and turns into water vapour.

C – Some of the evaporated water has turned back into a liquid on the lid of the pan. The water vapour condenses back to water.

?

- 1 What happens to the salt in photograph A?
- 2 What happens to water when it evaporates?
- 3 a If you were to taste the water that has collected on the lid in photograph C, do you think it will taste salty?
b Explain your answer.

When a liquid turns into a gas it is called **evaporation**. Only the liquid can evaporate, so anything dissolved in the liquid will get left behind. If the gas is turned back into a liquid, the liquid will be pure. When a gas turns into a liquid it is called **condensation**.

You should know...

- What evaporation and condensation are.
- When a liquid evaporates, anything dissolved in it gets left behind.

P

Jane is heating blue ink. Some evaporates to become a gas. She makes the gas condense on a tile.

- Will the liquid that collects on the tile be blue?
- Explain why you think this.

?

- 4 Copy this diagram and add the words 'evaporating' and 'condensing' on the arrows, instead of the question marks.
