Heuristic Reasoning in Management Accounting Jörn Sebastian Basel, Jörn Basel, 2012 Heuristics are short cuts and deliberately ignore information for instance through examining fewer cues or integrating less information However this collides with a view on management accountants and controllers as rational agents which seems to suggest that all available information should be considered As their role as information supplier is often accompanied with the task to assist managers in their judgment and decision making they have huge influence on these processes Therefore it is of high relevance to know if how and which heuristics management accountants and controllers use Furthermore we need to know which individual and situational factors influence their usage of heuristics With a series of five empirical studies applying a mixed methods research design the author sheds light to these research questions and addresses some central claims of the potential biases but also the stunning benefits of relying on heuristic reasoning Central to his discussion are dual process approaches which are debated in cognitive psychology Scholars of these approaches claim that we should distinguish between two distinct processes or systems of the human mind Following this interpretation heuristics are processes which are described as intuitive automatic fast and unconscious They are routinized cognitive processes which are based on experience in certain social environments and thus often exhibit ecological rationality Overall this book picks up an up to date topic in behavioural accounting research which not only is of relevance for researchers but as well for practitioners

Quantitative Methods for Management Decisions William P. Cooke, 1985 **Community Participation in School Management** Kazuro Shibuya, 2022-09-12 Nobody denies that trust in schools is key to success in generating any educational outcomes However trust is often eroded resulting in conflicts alienation and differentiation among school level stakeholders This book analyses school based management SBM of education through the lens of relational trust in the context of Ghana revealing how community participation in school management leads to educational outcomes Conducting quantitative analysis of headteacher questionnaires from public basic schools and qualitative analysis of case study schools in the Akatsi South District of Ghana Shibuya offers critical insights into building sustainable relationships between individual households and geographical school communities He argues it is critical to highlight relational trust as an analytical tool to examine relationships between actors and factors in school management The research finds that trust in schools is a two way mechanism and the mutuality of expectations and obligations among stakeholders is essential if children's learning outcomes are to improve With its mixed methods approach this book will be a valuable resource for scholars in comparative education those in educational development and those interested in African contexts **Supply Chain Engineering** A. With the unprecedented technological developments and innovations at hand, sustainability can be maximized for all the activities of a supply chain including service concept and product design, material sourcing and procurement, manufacturing processes, delivery of the final product and end of life management of the product. Consequently the sustainable supply chains problems require a systematic and integrated approach. Modeling and simulation in general as well as system dynamics and agent based modeling in particular have the capabilities to deal with the complexity of sustainable supply chain related problems. This book will appeal to professionals and researchers in the field.
