

### Exercise 1

Read the article on Ahmad carefully and answer the following questions.

Ahmad has always been a very helpful boy. He enjoys providing assistance to others who are in need. To Ahmad, helping people in need is not only very satisfying for him, but also allows him to meet many new people and build new friendships.

Knowing this, Ahmad regularly volunteers at an old folks home near his house. During the weekends, Ahmad will dedicate an afternoon to visit the old people at the home, bring them yummy snacks as well as play games and chit chat with the elderly people.

Many of the home's residents look forward to seeing Ahmad every week. Many of their faces light up whenever he arrives at their home as they know that they have someone from the outside to talk to and share stories with.

Ahmad hopes that he can continue to bring joy to the old folks and he feels happy that he is able to help as much as he can. Seeing the smiling faces of people in their golden years is deeply satisfying and his parents are very proud of him for being such a caring son.

service that allows you to provision and manage AWS infrastructure as code With CloudFormation you can define templates JSON or YAML files that describe the resources and configurations you want and AWS will automatically create and manage those resources for you This helps automate the process of deploying and managing infrastructure in a repeatable and consistent manner Explain IAM in AWS IAM Identity and Access Management is a service that enables you to manage access to AWS resources securely IAM allows you to create and manage users groups roles and permissions allowing you to control who can access which resources and what actions they can perform IAM helps you enforce security best practices and maintain compliance with security policies What is CloudWatch Amazon CloudWatch is a monitoring and observability service that provides visibility into your AWS resources and applications It collects and tracks metrics logs and events allowing you to monitor the performance health and operational status of your AWS environment in real time CloudWatch provides dashboards alarms and automated actions to help you respond to operational issues and optimize resource utilization These are just a few examples of AWS interview questions you might encounter Depending on the specific role and requirements interviewers may also ask about topics such as security networking serverless computing cost management and more Make sure to review the AWS documentation and practice hands on with AWS services to prepare effectively for your interview

**IT Interview Questions and Answers - English** Navneet Singh, Here are some common IT interview questions along with suggested answers to help you prepare Technical Questions What is the difference between TCP and UDP Answer TCP Transmission Control Protocol is connection oriented meaning it requires a connection to be established before data can be sent It ensures data is delivered in the same order it was sent and checks for errors UDP User Datagram Protocol is connectionless and does not guarantee order or error checking making it faster but less reliable It is used for applications where speed is critical and some data loss is acceptable such as streaming video Explain the concept of normalization in databases Answer Normalization is the process of organizing data in a database to reduce redundancy and improve data integrity It involves dividing large tables into smaller related tables and defining relationships between them The main normal forms are 1NF First Normal Form 2NF Second Normal Form 3NF Third Normal Form and BCNF Boyce Codd Normal Form What are RESTful services Answer REST Representational State Transfer is an architectural style for designing networked applications RESTful services are web services that use HTTP methods GET POST PUT DELETE for communication They operate on resources identified by URLs and typically exchange data in formats like JSON or XML How does a VPN work Answer A VPN Virtual Private Network creates a secure connection over a public network such as the internet It uses encryption to protect data transmitted between the user's device and the VPN server This ensures privacy and security allowing users to access resources as if they were on a private network What is cloud computing Answer Cloud computing is the delivery of computing services servers storage databases networking software analytics and more over the internet the cloud It offers faster innovation flexible resources and economies of scale Users typically pay only for cloud

services they use helping to lower operating costs and run infrastructure more efficiently

**Behavioural Questions**

Can you describe a time when you had to troubleshoot a difficult problem

**Answer** Certainly At my previous job we had an issue where our main application server was intermittently crashing causing significant downtime I systematically analysed the server logs and used diagnostic tools to narrow down the issue to a memory leak in one of our recently deployed modules I worked with the development team to patch the module which resolved the issue and improved our system s stability

How do you stay updated with the latest technology trends

**Answer** I regularly follow industry news through tech blogs podcasts and websites like TechCrunch and Wired I also participate in online courses and attend webinars and conferences

Engaging in professional forums and communities like Stack Overflow and GitHub also helps me stay informed and connected with other professionals

Describe a project you have worked on and your role in it

**Answer** I recently worked on a project to migrate our company s on premises data infrastructure to AWS My role was to design the architecture set up the AWS environment and lead the data migration process I coordinated with various teams to ensure minimal downtime and trained staff on using the new cloud based tools The project improved our scalability and reduced our infrastructure costs by 30%

How do you prioritize tasks when you have multiple deadlines

**Answer** I prioritize tasks based on their urgency and impact I use tools like Trello or Jira to manage my tasks and deadlines For critical projects I break them down into smaller manageable tasks and focus on completing high priority items first

Effective communication with my team also ensures we re aligned on priorities and deadlines

How do you handle working under pressure

**Answer** I stay calm and focused by breaking down the problem into smaller tasks and tackling them one at a time I also prioritize tasks and delegate when possible Taking short breaks to clear my mind helps me stay productive

Communicating effectively with my team and stakeholders ensures everyone is aware of progress and any potential delays

**Scenario Based Questions**

You discover a critical security vulnerability in a deployed application What steps do you take

**Answer** First I would assess the vulnerability s impact and severity Then I would notify relevant stakeholders and work with the development team to develop and test a patch If necessary I would take immediate action to mitigate the risk such as temporarily disabling the affected feature After deploying the patch I would conduct a thorough review to ensure the issue is resolved and update our security protocols to prevent future vulnerabilities

How would you handle a situation where a key project is falling behind schedule

**Answer** I would first analyse the reasons for the delay by reviewing the project plan and speaking with team members I would then identify critical tasks and reallocate resources or adjust priorities to get back on track

Communicating with stakeholders about the delay and the steps being taken to address it is crucial If necessary I would also consider extending deadlines or bringing in additional help to ensure the project s success

**Technical Test Problem Solving**

Write a function to reverse a string in Python

**Python** Describe how you would design a scalable web application

**Answer** I would start with a microservices architecture breaking down the application into smaller independent services Each service would be containerized using Docker and managed with

Kubernetes for orchestration I would use a load balancer to distribute traffic evenly and ensure high availability Data storage would be handled by a combination of relational and NoSQL databases depending on the requirements For scaling I would use auto scaling groups and implement caching mechanisms like Redis or Memcached to reduce database load Monitoring and logging tools like Prometheus and ELK stack would be used to track performance and troubleshoot issues **IT**

**Technical Skills Interview Questions and Answers - English** Navneet Singh, Here are some common technical skills interview questions along with suggested answers What programming languages are you proficient in Example Response I am proficient in several programming languages including Java Python and JavaScript I have experience developing applications websites and software solutions using these languages and I stay updated on industry best practices and emerging technologies Can you walk me through your experience with specific technology or tool Example Response Certainly In my previous role I utilized specific technology or tool extensively to describe relevant tasks or projects For example I used specific feature or functionality to achieve specific outcome or goal demonstrating my proficiency and understanding of the tool s capabilities How do you approach debugging and troubleshooting technical issues Example Response When faced with technical issues I adopt a systematic approach to debugging and troubleshooting I start by gathering relevant information such as error messages and logs to identify the root cause of the problem I then systematically test hypotheses isolate the issue and apply appropriate fixes or workarounds I document the troubleshooting process and solutions for future reference and share insights with team members to promote knowledge sharing Describe a challenging technical problem you encountered and how you resolved it Example Response In a previous project we encountered a performance bottleneck in our application that was causing slow response times and user dissatisfaction To address the issue I conducted a comprehensive performance analysis including profiling the code analysing database queries and identifying areas for optimization I implemented caching mechanisms optimized database queries and refactored critical sections of the codebase resulting in significant performance improvements and a better user experience What experience do you have with cloud computing platforms such as AWS Azure or Google Cloud Example Response I have experience working with AWS where I have deployed and managed cloud infrastructure including EC2 instances S3 storage and RDS databases I have also leveraged services such as Lambda API Gateway and DynamoDB to build scalable and resilient applications Additionally I have experience with infrastructure as code tools like Terraform and configuration management tools like Ansible for automating deployments and managing cloud resources How do you stay updated on new technologies and industry trends Example Response I stay updated on new technologies and industry trends by regularly reading tech blogs attending webinars and participating in online forums and communities I also take online courses and tutorials to learn new skills and experiment with emerging technologies through personal projects and side projects Additionally I collaborate with colleagues and attend tech conferences to exchange ideas and stay informed about the latest developments in the field Can
