

## What is mechanical advantage?

If you study the three pulley systems above you will note that each system has both **supporting** ropes and **non-supporting** ropes. Supporting ropes are ones which, as the name suggests, support the load. Only the first two pulley systems have non-supporting ropes which I have indicated.

The non-supporting ropes in the first two pulley systems above simply change the direction of the force.

To calculate the mechanical advantage in a moveable pulley system, we simply have to count the number of **supporting** ropes. Counting the supporting ropes in the pulley systems above, the mechanical advantage of each of system is, from left to right 2, 3, and 5.
