Most dogs die much earlier than their potential to live because of poor diets and unnecessary medication. Living a lifestyle supplemented by preservatives, fillers, animal byproducts, additives and chemicals is NOT the life you want for your dog. What you want is a 100% natural diet, but one that is done the right way. This book will go over how to safely consume a natural raw meat diet and improve your dog's overall digestive and immune systems. Here are just a handful of topics the guide covers: The benefits of a good dog diet. The effects of a poor dog diet. Essential nutrients and vitamins required by your dog. Do dogs need carbohydrates? The effects of raw food on dogs. Switching from commercially prepared food to raw food diet. Raw vs cooked dog food. Overcoming your fears and anxieties. Biggest myths on raw dog food. This is no different from your own personal needs. Think about it: your health and well-being is mainly determined by what you eat or consume. Like you, dogs can get sick easily if their diet leads to a weak immune system and this affects their lifespan. What you probably don't know is that sickness and early death can be totally prevented from the

very beginning by correcting your dog's diet to what it is meant to be. When you feed your dog the right food, you can sit back and relax because your Best Friend will stay happy, healthy, and live much longer.
