, AFROLEON Adeboye Oluwajuyitan, M.D.,2022-06-18 Before my version begins to fade Let me relieve what happened today Today was not a lifetime of discrimination and shame But of celebration as a black man living in Ukraine culled from the EPIGRAPH A brave and explorative Artisan Calm exterior but he was born a warrior A Leon not bothered about territory A Leon who hunted alone And a Leon who hurt alone With a free prefrontal cortex he came prepared for learning And learn he did as his memory campus would get soiled with complex realities In my first anatomy tour all I saw were dry cadavers But by the end of my tenure I saw my own fresh blood No tribal marks but you can tell he started out with an Afro And in this foreign soil explorations were his special dish To and fro he evolved and no he didn't hail from the safari From a genial ark but he always kept his wits about him And when he stepped out he was like a fresh aphrodisiac Through his eyes you could hear all of his favorite tunes Black vanilla at his core as he had a thing for interfacing General with a stylus brush Hankie forever in the back pocket Like his paws his heart appears four chambered But on closer inspection you see a fifth chamber a short distance away from the rest A blind Cub walking in the midst of hyenas With lesions so deep they suffocated him where it hurt most The pages are filled with art and expression As I relive this once in a lifetime experience Which shaped me into the man I am today Daily Graphic Ransford Tetteh,2008-12-03 HWM ,2007-10 Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews Recent Advances In Circuits And Systems Nikos E Mastorakis,1998-10-12 Recent Advances in Circuits and Systems brings you a balanced state of the art presentation of the latest concepts methods algorithms techniques procedures and applications of the fascinating field of Circuits and Systems Written by eminent leading international experts the contributors provide up to date aspects of topics discussed and present fresh original insights into their own experience with Circuits and Systems The main aim of this book is to present most of the new trends and recent advances of the impressive evolution in the discipline of circuits and systems Special emphasis is given in the interaction between the classic areas of systems theory feedback control circuits design electronics etc and the modern techniques of computational intelligence neural networks genetic algorithms fuzzy logic and expert systems since this fertile interaction promises to open up new horizons in circuits and systems theory This book is composed of four parts Part I is devoted to Circuits and Electronics and also includes Power Systems Part II refers to Systems Theory and Control H infinity problems feedback control non linear systems robust stability and robust control multivariable systems hybrid systems and hydraulic systems Part III presents the latest developments in the Robotics theory and applications while Part IV is devoted to Computational Intelligence in Systems Theory HWM ,2007-12 Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews Business Today ,2008 Financial Disclosure Reports of Members of the U.S. House of Representatives for the Period Between January 1, 2002 to December 31, 2002 United States.
