The fourth edition of the European Conference on Model Driven Architecture Foundations and Applications, ECMDA FA 2008, was dedicated to furthering the state of knowledge and fostering the industrialization of the model driven architecture (MDA) methodology. MDA is an initiative proposed by the Object Management Group (OMG) for platform generic software development. It promotes the use of models in the specification, design, analysis, synthesis, deployment, and evolution of complex software systems. ECMDA FA 2008 focused on engaging key European and international researchers and practitioners in a dialogue which will result in a stronger, more efficient industry producing more reliable software on the basis of state of the art research results. ECMDA FA is a forum for exchanging information, discussing the latest results, and arguing about future developments of MDA. It is a pleasure to be able to introduce the proceedings of ECMDA FA 2008. ECMDA FA addresses various MDA areas including model management, executable models, concrete syntaxes, aspects and concerns, validation, and testing model based systems, engineering model driven development and service oriented architectures, and the application of model driven development.
