Groupware: Design, Implementation, and Use Jörg M. Haake, Jose A. Pino, 2002-08-14 Welcome to the 8th International Workshop on Groupware CRIWG 2002 The previous workshops took place in Lisbon Portugal 1995 Puerto Varas Chile 1996 El Escorial Spain 1997 B zios Brazil 1998 Cancun Mexico 1999 Madeira Portugal 2000 and Darmstadt Germany 2001 CRIWG workshops follow a simple recipe for success good papers a small number of participants extensive time for lively and constructive discussions and a high level of cooperation both within and between paper sessions CRIWG 2002 continued this tradition CRIWG 2002 attracted 36 submissions from 13 countries nine of them outside Ibero America Each of the 36 articles submitted was reviewed by at least three members of an internationally renowned Program Committee This year we used a double blind reviewing process i e the reviewers did not know who the authors of the papers were In addition the reviewers were chosen based on their

expertise and we also ensured that they came from countries and institutions not related to those of the paper's authors. This reviewer assignment worked remarkably well as indicated by the high average confidence value the reviewers gave their own reviews. This means that papers were usually reviewed by experts in the paper's topic. As a consequence, reviews were usually quite extensive and contained many suggestions for improvements. I would like to thank all the members of the Program

Committee for their hard work which I am sure contributed to improving the quality of the final articles. Multimodal Human-Computer Communication Harry Bunt, Robbert-Jan Beun, Tijn Borghuis, 2006-07-27. This book constitutes the strictly reviewed post-workshop documentation of the First International Conference on Cooperative Multimodal Communication held in Eindhoven, The Netherlands, in 1995. The volume presents an introductory survey and carefully revised and updated full versions of three invited contributions and 14 papers selected for inclusion in the book after intensive reviewing. Among the issues addressed are intelligent multimedia retrieval, cooperative conversation agent system communication, multimodal maps, multimodal plan presentation, multimodal user interfaces, multimodal dialog, and various systems for multimodal HCI.
