**Legal Aspects of International Drug Control** S. K. Chatterjee,2013-12-11 The need for suppressing the illicit traffic in drugs can hardly be over emphasized Yet the licit uses of drugs especially for medical and scientific needs cannot be suppressed Apparently it is a question of determining the world requirements of drugs for such legitimate uses and of producing and manufacturing them accordingly Owing to their multifarious medical uses in various parts of the world it proves to be almost impossible to determine exactly the amount of drugs required for legitimate purposes There is also the complicating factor that drugs are used for sociological and religious reasons which have a long history Not only are the licit uses and legitimate amounts of drugs difficult to determine but also such difficulties give rise to illicit traffic in them Yet it is believed that a concerted international policy coupled with national co operation on various facets of the related problems namely limitation of production and or manufacture of drugs restriction on cultivation of plants that may contribute to addiction producing substances training and rehabilitation of drug addicts and efficient national administration would help eradicate drug abuse In search of an appropriate remedy this book has been devoted to a practical study of the problem and to exploring in this area of international law the relationship between the political and economic interests and the international economic order
