Simpson,Associate Professor of History and Asian Studies Bradley R Simpson,2025-10-14 The idea of self determination is one of the most significant in modern international politics For more than a century diplomats lawyers scholars activists and ordinary people in every part of the globe have wrestled with its meaning and implications for decolonization human rights sovereignty and international order The First Right argues that there was no one self determination but a century long contest between contending visions of sovereignty and rights that were as varied and changing as the nature of sovereignty itself In this globe spanning narrative Simpson argues that self determination s meaning has often emerged not just from the United Nations but from the claims of movements and peoples on the margins of international society Powerful states he shows persistently rejected expansive self determination claims arguing that these threatened great power conflict the dissolution of international order or the unravelling of the world economy Pacific Island territories indigenous peoples regional and secessionist movements and transnational solidarity groups among others rejected the efforts of large powerful states to define self determination along narrow lines Instead international historian Bradley R Simpson shows they offered expansive

visions of economic political and cultural sovereignty ranging far beyond the movement for decolonization with which they are often associated As they did so these movements and groups helped to vernacularize self determination as a language of social justice and rights for people around the world An ambitious work of global breadth on a key geopolitical issue The First Right transforms how we think about the making of the twentieth century world order and the place of the global South and decolonization in it

Conflicted Identities Alexandra Staub,2015-10-23 Nation states have long used representational architecture to create symbolic identities for public consumption both at home and abroad Government buildings major ensembles and urban plans have a visibility that lends them authority while their repeated portrayals in the media cement their image as icons of a shared national character Existing in tandem with this official self however is a second often divergent identity represented by the vast realm of domestic space defined largely by those who occupy it as well as those with a vested interest in its cultural meaning Using both historical inquiry and visual spatial and film analysis this book explores the interaction of these two identities and its effect on political control class status and gender roles Conflicted Identities examines the politicization of both public and domestic space especially in societies undergoing rapid cultural transformation through political social or economic expansion or restructuring when cultural identity is being rapidly modernized shifted or realigned to conform to new demands Using specific examples from a variety of national contexts the book examines how vernacular housing legislation marketing and media influence a large but often underexposed domestic culture that runs parallel to a more publicly represented one As a case in point the book examines West Germany from the end of World War II to the early 1970s to probe more deeply into the mechanisms of such cultural dichotomy On a national level post war West Germany demonstratively rejected Nazi era values by rebuilding cities based on interwar modernist tenets while choosing a decidedly modern and transparent architecture for high visibility national projects In the domestic realm government media and

everyday citizens countered this turn to state sponsored modernism by embracing traditional architectural aesthetics and housing that encouraged patriarchal family structures Written for readers interested in cultural theory history and the politics of space as well as those engaged with architecture and the built environment *Conflicted Identities* provides an engaging new perspective on power and identity as they relate to architectural settings
