Pastoral Care 11-16 Noel Purdy, 2013-05-16 A critical guide to effective pastoral care provision exploring a range of issues including bereavement bullying child abuse domestic violence separation divorce self harm and suicide **The administration of examinations for 15-19 year olds in England** Great Britain: Parliament: House of Commons: Education Committee, 2012-07-03 This report from the Education Committee looks at the administration of examinations for 15-19 year olds in England The Committee expresses serious concerns about incentives in the exam system and about competition on syllabus content Incentives in the system should be changed so the downward pressure through the competition of exam boards is mitigated The Committee considers a number of options to change incentives including i A single board This offers a simpler system with no risk of competition but the Committee believes the cost risk and disruption outweigh the benefits ii Franchising of subjects to exam boards This removes syllabus competition but again has downsides 3 Or the current system of multiple boards The Committee sees no benefit in competition on syllabus content but the setting and marking of exams and associated administration if properly regulated could generate incentives and drive quality up offering value for money to schools and colleges The Committee also recommends the development of national syllabuses accredited by Ofqual The syllabuses would be developed by exam boards in conjunction with learned bodies and employer organisations and could therefore retain the benefits of competition on quality and the incentive for exam boards to innovate

Enhancing Primary Science: Developing Effective Cross-Curricular Links Kelly, Lois, Stead, Di, 2013-02-01 How can other subjects in the primary curriculum enhance the teaching and learning of primary science The key argument in the book is that children s learning is enriched through both discrete subject teaching and cross curricular approaches to the curriculum and that children become more effective learners when they make links between the different subjects This book gives helpful insights into why making effective cross curricular links enriches science and discusses when and how to make effective and authentic links between science and other subjects Each chapter tackles a particular subject and considers how it can enhance science learning through a variety of approaches and a wealth of ideas for the classroom Written in a clear accessible and informative style this book Includes contributions from a range of expert practitioners Provides a good balance between theory and practice Includes practical advice and tasks to help develop your confidence and skill in cross

curricular teaching is illustrated with examples of pupils' voice. This book is ideal for students, teachers and schools who wish to adopt a cross-curricular approach to teaching and enhance their primary science curriculum. Contributors: Alison Brade, Mark Hamill, Sharon Harris, Shelagh Hendry, Alison Hermon, Pat Hughes, Arthur Kelly, Liz Lawrence and Cliff Porter. Let this book take you by the hand and guide you skilfully past the pitfalls of cross-curricular teaching in primary science whilst enjoying the celebration of creative and effective links between science and other subjects. It is full of practical suggestions for cross-curricular work but it never loses sight of the need for clear learning goals. Rooted in the principles of collaborative learning, this book inspires and informs. Anne Goldsworthy, Independent Science Consultant. This important book explores a practical framework for cross-curricular teaching of science through a closely referenced theoretical rationale. There are a range of open-ended tasks that illustrate the rich learning opportunities that can be planned for when expert subject knowledge combines with a pedagogy for enquiry. This is an essential read for all teachers inspired to tailor the curriculum to the needs and interests of their children. Alison Peacock, Headteacher of The Wroxham School and Transformative Learning Alliance Network Leader for the Cambridge Primary Review. I enjoyed this book sharing insights into cross-curricular approaches to primary science. The authors have successfully demonstrated how they have put theory into practice. There are many useful activities clearly outlined for use in the classroom based on the authors' own experiences. The reader will gain sound knowledge and understanding of how and why cross-curricular approaches can enhance primary science through worked examples. My particular favourite was the History of Bread. I will certainly recommend this book to my students. Kathy Schofield, Senior Lecturer for Primary Science, Manchester Metropolitan University, UK. These ideas have given me the confidence that cross-curricular approaches can enrich scientific provision rather than dilute it. Primary School Teacher.

Apprenticeship: A key route to skill 5th report of session 2006-07 Vol 2 Evidence *Educational Research and Policy-Making* Lesley Saunders, 2007-09-12. Looking into the troubled relationship between research and policy making in education with contributions from leading UK educationalists, this book will be invaluable to academics wanting to learn from the experience of senior researchers. *Social Science Methodology* John Gerring, 2011-12-15. John Gerring's exceptional textbook has been thoroughly revised in this second edition. It offers a one-volume introduction to social science methodology relevant to the disciplines of anthropology, economics, history, political science, psychology and sociology. This new edition has been extensively developed with the introduction of new material and a thorough treatment of essential elements such as conceptualization, measurement, causality and research design. It is written for students, long-time practitioners and methodologists and covers both qualitative and quantitative methods. It synthesizes the vast and diverse field of methodology in a way that is clear, concise and comprehensive. While offering a handy overview of the subject, the book is also an argument about how we should conceptualize methodological problems. Thinking about methodology through this lens provides a new

framework for understanding work in the social sciences
