Canadian Hours of Service
Driver Quick Reference Card
For use with the Qualcomm Mobile Computing Platform 100 (MCP100)

Accessing Hours of Service

Log in and tap the HOS (Hours of Service) icon.

Functions Summary

HOS supports three rule sets: U.S., Canada North, and Canada North. Rule sets don't automatically change when you cross the border. To change to a different rule set, go to the Clocks tab, tap **Regions**, and select the rule set.

The top line is always visible and shows the driver's name and status: ● indicates the active driver; ○ indicates the inactive driver. To view a second driver, tap the drop-down list.

You also see the current MCP100T date, followed by the remaining time before you are in violation (ROT = Canadian rules; OFF = U.S. rules).

The tabs are dynamic. The labels change to reflect activities you perform by tapping a button on a tab.

Status tab provides you with a quick view of your current status and allows you to change status. For more information, see Status Tab Functionality on the right.

Summary tab shows you progress bars that summarize your remaining time before violating an Hours of Service rule. These bars reflect the current rule set.

Clocks tab displays your remaining times according to the rule sets. For a description of the functions on this tab, see Clocks Tab Functionality on the reverse.

Graph tab provides a visual display of your duty statuses over a 24-hour period. You can also view a graph for each day in your most recent duty cycle.

Day Log tab shows duty status details for the current day and each day in your cycle.

Cycle 1 or 2 tab supports two duty cycles for Canadian rules: 7-day and 14-day. For U.S. rules, the tab is either 8-days or 7-days, depending on your carrier's cycle.

Approve tab shows records that have not been approved.

Load tab shows recent load information, and you can enter new load details. You can also see your home terminal address.

WARNING

Driver - Do not use while vehicle is in motion!

Use of display and while driving will cause distraction and loss of vehicle control which may lead to serious injury or death.

Status Tab Functionality

The Status tab shows your current status times.

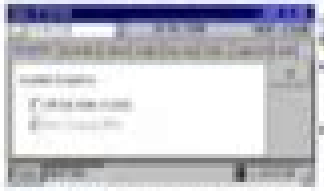
Current Status indicates your current activity (Sleeper, On Duty, etc.). To manually change a duty status, tap the **Change** button.

Start shows when you started the activity based on the current rule set.

Now shows the current date and time based on the current rule set.

Duration shows the length of time of the current duty status.

Current Exception indicates if you have specified an exception to a rule. To change an exception, tap the **Exceptions** button.



Select an exception and tap **OK**. Canadian exceptions:

- **Ferry Crossing** to account for the time of a ferry crossing.
- **Off-Duty Deferral** allows you to defer two hours of off-duty time until the next day.

Start of Day is determined by your home terminal (base).

Clock In and **Clock Out** buttons allow you to account for time away from the truck in the yard or in the future, such as driver meetings.
