Ending the neglect to attain the Sustainable Development Goals, 2021-01-28 Sustainable Education and Development—Clean Energy Clinton Aigbavboa, Wellington Thwala, Joseph N. Mojekwu, Lawrence Atepor, Emmanuel Adinyira, Gabriel Nani, Emmanuel Bamfo-Agyei, 2025-02-07 This book is Volume 1 of the proceedings of 2023 Sustainable Education and Development Research Conference This volume concentrates on papers in the area of clean energy Despite considerable progress more than 700 million people worldwide still lack access to electricity and around 2.4 billion people continue to use harmful and polluting fuels for cooking While efforts have been made to promote renewable energy and energy efficiency they have not been fast enough to achieve Sustainable Development Goal 7 Adding to the challenge the ongoing war in Ukraine has contributed to rising global energy prices and heightened energy insecurity in Europe In response to the energy crisis some European countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency However others are considering a resurgence of coal which poses a risk to the overall green transition Between 2010 and 2020 the percentage of the global population with access to electricity increased from 83% to 91% with 1.3 billion people gaining access Nevertheless this leaves approximately 733 million people still without electricity and most of them reside in sub-Saharan Africa Achieving universal access by 2030 the annual growth rate in access needs to accelerate from 0.5 percentage points to 0.9 percentage points necessitating significant efforts in low income fragile and conflict affected countries In 2020 69% of the global population had access to clean cooking fuels and technologies While more than half of those without access to clean cooking fuels live in Asia the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in Africa The share of renewable sources in total final energy consumption reached 17.7% globally in 2019 just slightly higher than the figure for 2015 The electricity sector leads in the adoption of renewables accounting for 26.2% of total final energy consumption in 2019 while the heat and transport sectors have made limited progress Global primary energy intensity defined as global total energy supply per unit of GDP improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019 However the rate of improvement 1.6% per year on average since 2015 falls short of the 3.2% annual rate needed to reach Sustainable Development Goal 7.3 International financial flows to support clean and renewable energy in developing countries reached 10.9 billion in 2019 a 23.6% decrease from 2018 This decline occurred even before the onset of the COVID-19 pandemic Over a longer five year moving average average annual commitments decreased for the first time

since 2008 from 17.5 billion in 2014 to 16.6 billion in 2015. Although developing countries achieved a record of 245.7 watts per capita in installed renewable energy generating capacity in 2020, small island developing States, least developed countries and landlocked developing countries have lagged behind. It would take least developed countries and landlocked developing countries nearly 40 years and small island developing States almost 15 years to reach the same level of progress as the average developing country in 2020. The 2023 SEDRC conference titled Sustainable Development and Education aims to redefine the understanding of research in the continent's development and the role of researchers. The conference focusses on applied research discussions and its dissemination. Researchers from research institutions, academicians, postgraduate students, politicians and industry representatives will be the primary audience for the conference proceedings.

Changing Face Of E-commerce In Asia Abhishek Behl, Pankaj Dutta, Pratima Amol Sheorey, Chris Rowley, 2022-03-23
Asia has been a hub for e-commerce companies in the past decade and the growth trajectory narrates the story of bright future. Its growth has largely impacted the economic, social and technological advancements in every country and contributed to global trade. Nonetheless, the success and failure of e-commerce companies lies on various factors, some of which include product pricing, competition strategies and business models. However, with surveys in India indicating how sale of counterfeit products remains a significant problem for online shoppers across many e-commerce sites, e-commerce companies claim they are taking tough steps to ensure that counterfeit products do not make their way to customers by delisting fraud sellers, using tamper-proof packaging and monitoring warehouses. This book aims to unwrap the stories of e-commerce companies in Asia and how they have contributed to the society. It discusses the growth and failures of some e-commerce giants and looks at both theoretical and practical aspects of e-commerce by presenting the issues, challenges and successes of e-commerce businesses. It examines interdisciplinary and transdisciplinary aspects from micro and macro perspectives and links disciplines like strategy, management, entrepreneurship, competitiveness, finance, technology and operations. *Handbook of Research on Quality and Competitiveness in the Healthcare Services Sector* Akkucuk, Ulas, 2023-03-24

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
