Quantitative Momentum Wesley R. Gray, Jack R. Vogel, 2025-10-13 The individual investor's comprehensive guide to momentum investing Quantitative Momentum brings momentum investing out of Wall Street and into the hands of individual investors In his last book Quantitative Value author Wes Gray brought systematic value strategy from the hedge funds to the masses in this book he does the same for momentum investing the system that has been shown to beat the market and regularly enriches the coffers of Wall Street's most sophisticated investors First you'll learn what momentum investing is not it's not growth investing nor is it an esoteric academic concept You may have seen it used for asset allocation but this book details the ways in which momentum stands on its own as a stock selection strategy and gives you the expert insight you need to make it work for you You'll dig into its behavioral psychology roots and discover the key tactics that are bringing both institutional and individual investors flocking into the momentum fold Systematic investment strategies always seem to look good on paper but many fall down in practice Momentum investing is one of the few systematic strategies with legs withstanding the test of time and the rigor of academic investigation This book provides invaluable guidance on constructing your own momentum strategy from the ground up Learn what momentum is and is not Discover how momentum can beat the market Take momentum beyond asset allocation into stock selection Access the tools that ease DIY implementation The large Wall Street hedge funds tend to portray themselves as the sophisticated elite but momentum investing allows you to borrow one of their top strategies to enrich your own portfolio Quantitative Momentum is the individual investor's guide to boosting market success with a robust momentum strategy

Ronald Fisher needed to develop elaborate models of genetic effects in order to set the foundations of Quantitative Genetics in his 1918 paper The correlation between relatives on the supposition of Mendelian inheritance Since then many significant implementations have been made to model genetic effects However at the verge of one century after Fisher s kick off models of genetic effects keep on being discussed and implemented Indeed the relatively recent advent of QTL analyses challenged the state of the art of this field by providing researchers the opportunity to obtain and analyze estimates of genetic effects from real data In this context the development of this field was not exempt of some polemics like the debate about the convenience of the functional and the statistical epistasis approaches This research topic is meant to provide recent developments in models and estimation of genetic effects and to enrich the discussion about how and why models of genetic effects must be further developed and applied The articles in this Research Topic shall thus extend refine and or provide a refresh look at Fisher s original models of genetic effects and their application to genetic effects estimation and to improve our understanding of evolutionary processes and breeding programs Economic Growth and Development Sibabrata Das,Alex Mourmouras,Peter C. Rangazas,2015-01-12 Growth theory provides a rich and versatile analytical framework through which fundamental questions about economic development can be examined This book is an introduction to the newer features of growth theory that are particularly useful in examining the issues of economic development Structural transformation in which developing countries transition from traditional production in largely rural areas to modern production in largely urban areas is an important causal force in creating early economic growth and as such is made central in this approach Towards this end the authors augment the Solow model to include endogenous theories of saving fertility human capital institutional arrangements and policy formation creating a single two sector model of structural transformation Based on applied research and practical experiences in macroeconomic development the model in this book presents a more rigorous quantifiable and explicitly dynamic dual economy approach to development Common microeconomic foundations and notation are used throughout with each chapter building on the previous material in a

continuous flow With its single model and focus on data and policy analysis this text is intended for beginning graduate students and policy makers interested in economic development

**Putting the Local in Global Education** Neal W. Sobania, 2023-07-03 The position taken in this volume is that domestic off campus study can be just as powerful a transformative learning experience as study overseas and that domestic programs can equally expand students horizons their knowledge of global issues and processes their familiarity and experience with cultural diversity their intercultural skills and sense of citizenship This book presents both the rationale for and examples of study away an inclusive concept that embraces study abroad while advocating for a wide variety of domestic study programs including community based education programs that employ academic service learning and internships With the growing diversification regionally demographically culturally and socio economically of developed economies such as the US the local is potentially a doorstep to the planet and presents opportunities for global learning Moreover study away programs can address many of the problematic issues associated with

study abroad such as access finance participation health and safety and faculty support Between lower costs the potential to increase the participation of student cohorts typically under represented in study abroad the lowering of language barriers and the engagement of faculty whose disciplines focus on domestic issues study at home can greatly expand the reach of global learning The book is organized in five sections the first providing a framework and the rationale for domestic study way programs addressing administrative support for domestic vs study abroad programs exploring program goals organization structure assessment and continuous improvement and considering the distinct pedagogies of experiential and transformative education The second section focuses on Semester Long Faculty Led Programs featuring examples of programs located in a wide variety of locations from investigations into history immigration culture and the environment through localities in the West and the Lowcountry to exploring globalization in L A and New York Section three highlights five Short Term Faculty Led Programs While each includes an intensive immersive study away experience two illustrate how a 7 10 day study away experience can be effectively embedded into a regular course taught on campus The fourth section on Consortium Programs describes programs that are either sponsored by a college that makes its program available to consortium members and non members or is offered by an independent non for profit to which institutions send their students The final section on Community Engagement and Domestic Study Away addresses the place of community based education in global learning and provides examples of academic programs that employ service learning as a tool for collaborative learning focusing on issues of pedagogy faculty development and the building long term reciprocal relationship with community partners to co create knowledge The book is intended for study abroad professionals multicultural educators student affairs professionals alternative spring break directors and higher education administrators concerned about affordably expanding global education opportunities

#### **Rethinking the Economics of Land and Housing** Josh

Ryan-Collins,Toby Lloyd,Laurie Macfarlane,2017-02-28 Why are house prices in many advanced economies rising faster than incomes Why isn t land and location taught or seen as important in modern economics What is the relationship between the financial system and land In this accessible but provocative guide to the economics of land and housing the authors reveal how many of the key challenges facing modern economies including housing crises financial instability and growing inequalities are intimately tied to the land economy Looking at the ways in which discussions of land have been routinely excluded from both housing policy and economic theory the authors show that in order to tackle these increasingly pressing issues a major rethink by both politicians and economists is required
