Political Fallout Toshihiro Higuchi, 2020-05-05 Political Fallout is the story of one of the first human driven truly global environmental crises radioactive fallout from nuclear weapons testing during the Cold War and the international response Beginning in 1945 the United States Britain and the Soviet Union detonated hundreds of nuclear weapons in the atmosphere scattering a massive amount of radioactivity across the globe The scale of contamination was so vast and radioactive decay so slow that the cumulative effect on humans and the environment is still difficult to fully comprehend The international debate over nuclear fallout turned global radioactive contamination into an environmental issue eventually leading the nuclear superpowers to sign the landmark Partial Test Ban Treaty PTBT in 1963 Bringing together environmental history and Cold War history Toshihiro Higuchi argues that the PTBT originally proposed as an arms control measure transformed into a dual purpose initiative to check the nuclear arms race and radioactive pollution simultaneously Higuchi draws on sources in English Russian and Japanese considering both the epistemic differences that emerged in different scientific communities in the 1950s and the way that public consciousness around the risks of radioactive fallout influenced policy in turn Political Fallout addresses the implications of science and policymaking in the Anthropocene an era in which humans are confronting environmental changes of their own making [Spaceflight Mechanics 2011](#) ,2011 **Government Reports**
