Rape and Sexual Assault White House Council on Women and Girls, 2014-10-31. This book analyzes the most recent reliable data about rape and sexual assault in our country. It identifies those most at risk of being victims of these crimes, examines the cost of this violence both to survivors and our communities, and describes the response too often inadequate of the criminal justice system. The report catalogues steps this Administration has taken to combat rape and sexual assault and identifies areas for further action. An overview of the problem: Women and girls are the vast majority of victims; nearly 1 in 5 women or nearly 22 million have been raped in their lifetimes. Men and boys however are also at risk: 1 in 71 men or almost 1.6 million have been raped during their lives. Women of all races are targeted but some are more vulnerable than others: 33.5% of multiracial women have been raped as have 27% of American Indian and Alaska Native women compared to 15% of Hispanic, 22% of Black and 19% of White women. Most victims know their assailants. The vast majority, nearly 98% of perpetrators are male. Young people are especially at risk: nearly half of female survivors were raped before they were 18 and over one quarter of male survivors were raped before they were 10. College students are particularly vulnerable: 1 in 5 women has been sexually assaulted while in college. Repeat female victimization is common: over a third of women who were raped as minors were also raped as adults. Other populations are also at higher risk of being raped or sexually assaulted including people with disabilities, the LGBT community, prison inmates of both genders, and the homeless. Undocumented immigrants face unique challenges because their abusers often threaten to have them deported if they try to get help.

**The Transformation of Title IX** R. Shep Melnick, 2018-03-06. One civil rights era law has reshaped American society and contributed to the country's ongoing culture wars. Few laws have had such far-reaching impact as Title IX of the Education Amendments of 1972. Intended to give girls and women greater access to sports programs and other courses of study in schools and colleges, the law has since been used by judges and agencies to expand a wide range of antidiscrimination policies, most recently the Obama administration's 2016 mandates on sexual harassment and transgender rights. In this comprehensive review of how Title IX has been implemented, Boston College political science professor R. Shep Melnick analyzes how interpretations of equal educational opportunity have changed over the years. In terms accessible to non-lawyers, Melnick examines how Title IX has become a central part of legal and political campaigns to correct gender stereotypes not only in academic settings but in society at large. Title IX thus has become a major factor in America's culture wars and almost certainly will remain so for years to come.

Stoeber,2019-02-26 A look at gun control campus sexual assault immigration and more that considers the future of responses to domestic violence Domestic violence is commonly assumed to be a bipartisan nonpolitical issue with politicians of all stripes claiming to work to end family violence Nevertheless the Violence Against Women Act expired for over 500 days between 2012 and 2013 due to differences between the U S Senate and House demonstrating that legal protections for domestic abuse survivors are both highly political and highly vulnerable Racial and gender politics the move toward criminalization reproductive justice concerns gun control debates and political interests are increasingly shaping responses to domestic violence demonstrating the need for greater consideration of the interplay of politics domestic violence and how

the law works in people's lives *The Politicization of Safety* provides a critical historical perspective on domestic violence responses in the United States. It grapples with the ways in which child welfare systems and civil and criminal justice responses intersect and considers the different overlapping ways in which survivors of domestic abuse are forced to cope with institutionalized discrimination based on race, gender, sexual orientation, and immigration status. The book also examines movement politics and the feminist movement with respect to domestic violence policies. The tensions discussed in this book, similar to those involved in the #MeToo movement, include questions of accountability, reckoning, redemption, healing, and forgiveness. What is the future of feminism and the movements against gender-based violence and domestic violence? Readers are invited to question assumptions about how society and the legal system respond to intimate partner violence and to challenge the domestic violence field to move beyond old paradigms and contend with larger justice issues. *50 Great Myths of Human Sexuality* Pepper Schwartz, Martha Kempner, 2015-04-20 *50 Great Myths of Human Sexuality* seeks to dispel commonly accepted myths and misunderstandings surrounding human sexuality, providing an enlightening, fascinating, and challenging book that covers the fifty areas the author believes individuals must understand to have a safe, pleasurable, and healthy sex life. This new edition has been updated and includes new chapters on WPS and Environmental Change and on WPS in Regional and Security Organizations. The 2nd edition provides an explanation of Women, Peace and Security as a security framework, different though related to both gender equality as a social justice issue or a Diversity, Equity, and Inclusion issue. Within the context of the changing nature of warfare, a complex and volatile global political climate, and through consideration of empirical evidence, it examines the definitions, theoretical underpinnings, and methodological challenges associated with implementing WPS. It then discusses, with more specificity, violence against women, women civilians in war, the role of women in peacemaking, women in the military, and in development, and women politicians, with new material on environmental change and on regional and security organisations. Examples and case studies draw from Africa, Asia, the Middle East, Europe, and North and South America. The need for more sex-disaggregated data on every topic is emphasized throughout, necessary to both demonstrate relationships between gender and security and to identify solutions to problems.

The book concludes with a look to the future and number of action items from the macro to the micro level This book will be of much interest to students of peace studies security studies gender studies and IR as well as professional military college students
