**Representation of Disability in Children's Video Games** Krystina Madej, 2024-01-10 Representation of Disability in Children's Video Games looks at how children's engagement with characters and stories in video games helps create the perception of disability they have as teens and adults Drawing on child development theory supported by neuroscience the

book shows how the scaffold of information the schema adults have of disability is first created at a very young age as they interact through play with characters with disabilities in narrative video games. Positing that early video game play experiences should provide exposure to narrative schemas that add understanding and help create meaning about the disability represented, the book presents how such representation in children's video games maps against cognitive development and the psychomotor and cognitive needs and abilities of children 3-12. Through close readings of over 40 PEGI 3 and PEGI 7 ESRB E 10 games and analysis of games as diverse as Backyard Baseball and Sly Cooper, the author defines broad categories of representation: representation as cosmetic, providing exposure but not game play utility; as incidental, used as a device that provides purpose for the narrative; or as more authentically representing the disability as integral to the character and their life. The book provides readers with an overview of contemporary games that better their understanding of how children's games present disability and how children create their perceptions through interaction with characters and stories. This book will be of interest to academics and students of game studies in topics such as behavioural science, ethics and HCI, as well as in sociology, communications and digital media. It is pertinent in particular to game developers and to educators, disability advocates, parents and policy makers.

**Broadening Critical Boundaries in Children's and Young Adult Literature and Culture** Amie A. Dougherty, 2018-10-30. This collection of essays explores a wealth of topics in children's and young adult YA literature and culture. The contributions include an examination of the Watchbird cartoons by Munro Leaf and their attempts to teach morals and manners; an ethnographic study about the role of public youth librarians; and an exploration of the role popular video games can play in the secondary classroom. Other topics investigated here encompass the presentation of environmentalism in Hayao Miyazaki's films, psychological analyses and the role of race, gender and culture in children's and YA literature.
