Raw Thought Raw Nerve Inside The Mind Of Aaron Swartz:

Raw Thought, Raw Nerve Aaron Swartz, 2014-10-26 Aaron Swartz taught himself to read when he was three At twelve he created Info Network a user generated encyclopedia which he later likened to an early version of Wikipedia Not long after Aaron turned his computer genius to political organizing information sharing and online freedom In 2006 Aaron downloaded the Library of Congress s complete bibliographic dataset The library charged fees to access them However as a government document it was not copyright protected within the USA By posting the data on OpenLibrary org Aaron made it freely available Eventually the Copyright Office sided in favor of Aaron In 2008 Aaron downloaded and released 2 7 million federal court documents stored in the Public Access to Court Electronic Records PACER database managed by the Administrative Office of the United States Courts The Huffington Post characterized his actions as Swartz downloaded public court documents from the PACER system in an effort to make them available outside of the expensive service The move drew the attention of the FBI which ultimately decided not to press charges as the documents were in fact public In late 2010 Aaron downloaded a large number of academic journal articles through MIT s computer network At the time Aaron was a research fellow at Harvard University which provided him with an authorized account Aaron s motivation for downloading the articles was never fully determined However friends and colleagues reported that his intention was either to publicly share them on the Internet or uncover corruption in the funding of climate change research This time faced with prosecutors being overzealous and a dysfunctional criminal justice system Aaron was charged with a maximum penalty of 1 million in fines and 35 years in prison leading to a two year legal battle with the US federal government that ended when Aaron took his own life on January 11 2013 Between 2007 and 2011 Aaron read over 600 books one book every three days Early on Aaron made a point to write about his findings and reflection From the Hello World post published on January 13 2002 to the last known article written on November 1 2012 What Happens in The Dark Knight Aaron published 1 478 articles on his personal blog one article every three days Aaron dealt with a wide range of subjects going from politics economics science sociology through technology education nutrition philosophy among many others But beyond that the clarity of Aaron s mind on the difficulty of the subjects he was dealing with at such a young age is striking When the typical 16 year old college student worries about fitting in and mating Aaron was tackling with a book publication and wondered about what he should do with his life At 18 he read Noam Chomsky and at 23 wrote the very impressive 12 000 word piece A Summary Explanation of John Maynard Keynes General Theory This article was dealing with such complexity that two days after its publication it was followed by a much shorter and accessible version titled Keynes Explained Briefly Five months before his death Aaron completed Raw Nerve a series of articles reflecting on life depicting an honest painful and yet beautiful picture of the tragedy of life Perhaps then Aaron knew his time was drawing to an end There have been numerous criticisms about Aaron s decision to end his life Some agree with it some don t Whether he made the right decision is certainly not for the editors of this

present book to comment on Instead we decided to focus on the positive impact Aaron made on us all Raw Thought Raw Nerve Inside the Mind of Aaron Swartz contains the life s work of one of the most original minds of our time One volume 824 pages Raw Thought, Raw Nerve: Inside the Mind of Aaron Swartz Aaron Swartz,2016-05-01 In late 2010 Aaron Swartz downloaded a large number of academic journal articles through MIT s computer network At the time Aaron was a research fellow at Harvard University which provided him with an authorized account Aaron s motivation for downloading the articles was never fully determined However friends and colleagues reported that Aaron s intention was either to publicly share them on the Internet or uncover corruption in the funding of climate change research Faced with prosecutors being overzealous and a dysfunctional US criminal justice system Aaron was charged with a maximum penalty of 1 million in fines and 35 years in prison leading to a two year legal battle with the US federal government that ended when Aaron took his own life on January 11 2013 Aaron taught himself to read when he was three At twelve he created a user generated encyclopedia which he later likened to an early version of Wikipedia He then turned his computer genius to political organizing information sharing and online freedom Aaron was on to making a better world for us all a freer world Raw Thought Raw Nerve Inside the Mind of Aaron Swartz contains the life s work of one of the most original minds of our time Notes on this second edition In October 2014 we published the first edition of this book see book Page 7 for details It was then the first and only book containing Aaron Swartz s lifetime work When the first edition of Raw Thought Raw Nerve Inside the Mind of Aaron Swartz was released we did not claim copyright Our copyright statement was then the same as it is today the content is copyrighted to Aaron Swartz In an article titled If I get hit by a truck Aaron Swartz asked that the contents of all my hard drives be made publicly available On his blog Aaron never mentioned anything against commercial publishing He was however against abusive and restrictive copyrights In August 2015 The New Press claiming to have obtained exclusive copyright from Sean B Palmer Aaron s legal IP owner and without notice took steps to shutdown our publication to release several months later a scaled down version of this present book Much has been said and written about this unlawful and unethical action towards Aaron s wishes but to this day May 2016 neither The New Press nor Sean B Palmer has made any public comments In publishing the first edition of this book our humble goal was to express what was going on in Aaron s mind i e who was he why did he repeatedly hacked into academic databases what was he trying to tell us The best way to achieve that was through the articles Aaron left on his website Some of them dated back to 2002 when he was 16 Through a total of 1364 articles available on his website Aaron clearly stroke us as sharp and openhearted Aaron surely like all of us was trying to find his place in this world but beyond that he was genuinely on the path to making this world a better place in the smartest possible way hence bringing solutions to some of today s problems and not merely criticizing what other people do which is very too often the case in politics He reminded us of Steve Jobs He could have been as brilliant as Jobs in his own field Although we selected 300 out of 1364 articles the resulting book was 824 page thick divided into seven categories i e
