

The Rwanda Genocide

Historical Background of the Rwanda Genocide

Rwanda is a small, landlocked country located in East Africa. For centuries, the region that is now Rwanda was inhabited by various ethnic groups, including the Hutu, Tutsi, and Twa. In the late 19th century, Rwanda became a German colony, and after World War I, it was transferred to Belgium.

During the colonial period, the Belgians introduced a hierarchy based on physical characteristics, distinguishing between the Hutu, Tutsi, and Twa. The Tutsi were considered to be the superior race, and they were given privileged positions in the colonial administration. This led to a growing resentment among the Hutu population.

In the mid-20th century, Rwanda gained independence from Belgium. The Hutu majority sought to end the Tutsi minority's privileged status. In 1959, a Tutsi-led group called the Rwandan Revolution (RRA) took power. The new government began to implement policies to reduce the Tutsi's influence, leading to a period of violence and displacement.

The International Response to the Genocide

The international community's response to the Rwandan genocide has been widely criticized for being slow, ineffective, and insufficient.

The United Nations Security Council (UNSC) established the United Nations Rwanda Mission (UNAMIR) in 1994. However, the mission was underfunded and under-manned, and it was unable to prevent the genocide.

Despite warnings of an impending genocide, the UN failed to provide the necessary resources to prevent the violence. When the genocide began, the UN Security Council failed to authorize an intervention force, and the UNAMIR mission was unable to stop the killing.

France, a former colonial power in Rwanda, also failed to intervene in the genocide. In fact, the French government supported the Rwandan government and provided them with military aid before and during the genocide. Some French soldiers were directly involved in the killing, and others were accused of covering up the genocide.

Some critics have argued that the French government was complicit in the genocide, as they have provided aid to the Rwandan government. The French government has denied these allegations and has argued that it acted to protect civilians in Rwanda. However, the continuing involvement of French soldiers in the genocide continues to be a topic of debate, and the French government has been accused of covering up its role.

The Genocide

The genocide began on April 7, 1994, following the assassination of Rwandan President Juvénalis Habyarimana, a Hutu, whose plane was shot down as it approached the capital, Kigali. This event triggered the Tutsi-led group for the attack, and they immediately began a campaign of violence against the Tutsi, as well as moderate Hutus who opposed the genocide.

The killings were carried out by government officials, soldiers, and ordinary citizens who were incited by propaganda spread through the country's radio stations and newspapers. The genocide was marked by extreme brutality, sexual violence, rape, and other acts of terror. Many Tutsi were killed, and many others fled the country as refugees. The genocide resulted in the deaths of an estimated 500,000 people.

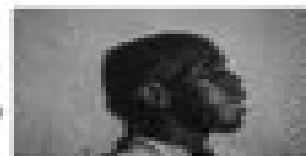

Following the genocide, there were widespread incidents of rape, torture, and destruction of property. The genocide was a result of a long history of discrimination and violence against the Tutsi.

Refugees in Rwanda

The United Nations Security Council (UNSC) established the United Nations Rwanda Mission (UNAMIR) in 1994. However, the mission was underfunded and under-manned, and it was unable to prevent the genocide.

Despite warnings of an impending genocide, the UN failed to provide the necessary resources to prevent the violence. When the genocide began, the UN Security Council failed to authorize an intervention force, and the UNAMIR mission was unable to stop the killing.

Consequences of the Genocide

The genocide resulted in a massive loss of life, with hundreds of thousands of people killed. The genocide also resulted in the displacement of millions of people, leading to a massive refugee crisis. The genocide had a profound impact on the Rwandan population, and it continues to be a source of pain and trauma for many survivors.

Reading Humanitarian Intervention Anne Orford,2003-06-26 During the 1990s humanitarian intervention seemed to promise a world in which democracy self determination and human rights would be privileged over national interests or imperial ambitions Orford provides critical readings of the narratives that accompanied such interventions and shaped legal justifications for the use of force by the international community Through a close reading of legal texts and institutional practice she argues that a far more circumscribed exploitative and conservative interpretation of the ends of intervention was adopted during this period The book draws on a wide range of sources
